I'm writing to oppose the WOPR plan to clearcut the forests of western Oregon. I feel that this plan irresponsibly threatens to damage our clean water and squander the natural resources that make Oregon our cherished home.

Clearcutting will remove the viability of the sustainable industries of fishing and tourism forever.

With Global warming threatening our very existence, we owe it to Oregon and the rest of the world to preserve the old growth forests as a means to absorb the carbon dioxide.

Please end this plan.
