Portland, OR 97208

Dear BLM,

I am a six year resident of Southern Oregon & would like to go on the record urging the BLM to choose a no action alternative in their WOPR decision.

The continuing harvest of old growth trees only compounds the threats of global warming & climate change. These old growth stands also provide vital habitats for threatend species which are necessary for a healthy ecosystem which we as humans are a part of. Forest management laws must be rewritten to benefit our planet & its inhabitants instead of bank accounts.

~~I ask all policy makers to choose a no action alternative & to start taking global warming into consideration when making decisions that will affect future generations for the rest of time.~~

Respectr your elders.
