I oppose the Western Oregon Plan Revisions proposed by the Bush Administration. The vast majority of the US population wants to see the ancient forest that still remain standing here in the Northwest protected once and for all. Please make the arrangements necessary to do so.

Let us focus instead on thinning the over crowded second growth that mismanagement has turned into severe fire hazards. I do not support the creation of new roads built through Oregon's forests.

Thank you for receiving these comments and respecting the wishes of Oregon's hard working citizens.
