Dear Bureau of Land Management,

I oppose your plan for our Western Oregon Forests. We have only a small percentage of old growth trees left and they are there for future generations. We can not replicate an old growth forest---it is impossible and what a tragedy that so much is already gone. It is time to take a breather and stop cutting any Federal Forests and in future only have sustainable removal of trees.

Sincerely, Ruth Duemler 1745 Fircrest Dr. Eugene OR 97403
