Re: BLM Forest Plan
Western Oregon Plan Revision

Greetings,

I am writing today to give support to your number two plan on future BLM timber sales. Myself and my company believe this plan is a plan that is desperately needed to provide funds to keep county government solvent and to provide jobs as well as improve forest management to provide timber for future generations. As far as the spotted owl is concerned let nature take its course, if the barred owl takes over its habitat so be it. Man will not be able to prevent it from happening, that is just the way nature works.

Thank you,

Edgar N. Roberts
Roberts Logging Company
