To whom it may concern,

I am very concerned that the preferred alternative for the WOPR strongly encourages Old Growth Logging, Road Building, and puts low emphasis on thinning of second growth.

Please uphold the Northwest Forest Plan, do not increase Coast Range Old Growth Logging, and concentrate management in second growth stands, which already have roads.

Additionally, I believe you should manage a significant percentage of Coast Range land on a very long rotation so that forests stands will gain old growth characteristics at 200-300 years of age.

Sincerely,

Jay Sexton
