I believe, by Law O&C lands need to be managed by BLM primarily for timber production. It's called use it or lose it. We are at a critical point for our school and community funding. True wealth for our nation comes from our natural resources, which God provides us with abundance. Now we are at the same point the Indians were 150 years ago when the Government removed them from their land and resources by empty promises, and a stroke of the pen "for their own good".

The environmental groups want to drive the final nail in our coffin for multiple use and remove us from our land. They fight all attempts to let us thin overloaded forests, with their activists judges. Their "let it burn, it's natural", rather than let rural resource dependent families utilize it, is criminal. We need to hold the environmental groups responsible for this theft of **our resources too!** Maybe we can charge them triple-stampage...Hmm.

In a perfect Survivor Show, the Resource Providers vanish and the Eco-vacation Crowd will have to provide for themselves following their own regulations.
