October 27, 2007

Dear Managers:

I am totally opposed to the Western Oregon Plan Revision. As a resident of western Oregon with a degree in Rangeland Resources from OSU, I can clearly see how this revision of the existing Northwest Forest Plan would negatively impact our public lands, waters, and native species. The increased erosion and habitat destruction resulting from this revision is completely unacceptable on BLM land. A very few would benefit from this destruction, and Oregonians who depend on these forests for water, livelihood and recreation would suffer, as would the natural heritage of all Americans. Please oppose and deny the implementation of the Western Oregon Plan Revision.

Sincerely,

Charlotte Campbell
