BLM Director

Please consider my comments about your revision on present forest plan.
A. No more road building.
B. These lands are needed for future clean water sources.
C. Old growth are better for fire protection than replants or logging.
D. Any salmon streams all the protection they can receive.
E. More taxpayer subsidized timber sales are not needed.
F. These irreplaceable lands are needed for future generation to visit and see, not tree farms we have bought now.
G. Old growth are needed for carbon sinks, more than ever!

Thanks

John R. Campbell
