Cliffside Gas Plant Status Report

Date & Time of Outage: November 4, 2019 at 0300 CT

Cause of Outage: Planned Maintenance

Factors Causing Restart:
- Planned Maintenance

Current Status:
- K100 – changing out the two cylinders. Progress is continuing, late start due to the purge not completed as early as expected.
- Air Products has completed the purging & cleaning of crossover check valve for the feed gas
- COMPLETED – Helium crew project of replacing the outlet piping on the drip tank & replacing the south coalesce filters is progressing.
- DGA vent pipe project (for odor control) is in progress (CASHE Safety Inspection item).
- Orifice plate checks are mostly complete, should be finished by tomorrow afternoon
- DCS backup work is in progress
- K610 relief valve checks in progress
- Replacement of DCS battery backup system in progress; reassembling the battery banks, etc.
- Load testing the batteries for MCC control power is in progress

Forecast:
- 4 to 7 days remaining on outage (based on 7-10 day notification/plan)
- Enerflex will start on K600 repairs when K100 is completed to the extent that some of the crew can be moved to the next project.
- BLM/Enerflex crew will be here to start on the chiller tomorrow

Pipeline Pressure at Cliffside: At 1500 (CT) Tuesday, November 5 = 1327 psig

Next Report: 0800 (CT) Wednesday, November 6, 2019
