Cliffside Gas Plant Status Report

Date & Time of Outage: November 4, 2019 at 0300 CT

Cause of Outage: Planned Maintenance

Factors Causing Restart:
- Planned Maintenance

Current Status:
- No safety issues
- Siemens controls Engineer on site for DCS checkup.
- DGA Flash Tank C-142 internal pressure wash project approved.
- K100 repair progress continuing on schedule. Service vendor onsite performed minor repairs to bridge crane to reset safety limit switch.
- K600 internal inspection and packing replacement started.
- DGA CO2 vent tie-in welding project progressing well.
- K610 pressure relief valves tested with 3 of 4 failing. Replacements on order.
- Booster Compressor insulation project progressing well and on schedule.

Forecast:
- 3 to 6 days remaining on outage (based on 7-10 day notification/plan)
- Enerflex will start on K600 repairs when K100 is completed to the extent that some of the crew can be moved to the next project.
- BLM/Enerflex crew will be here to start on the chiller today

Pipeline Pressure at Cliffside: At 1500 (CT) Wednesday, November 6 = 1236 psig

Next Report: 0800 (CT) Thursday, November 7, 2019
