Cliffside Gas Plant Status Report

Date & Time of Outage: November 4, 2019 at 0300 CT

Cause of Outage: Planned Maintenance

Factors Causing Restart:
- Planned Maintenance

Current Status:
- Beginning Day 4. No safety issues to date. Icy conditions at plant with rain and sleet.
- Siemens Engineer on site continuing for DCS controls checkup.
- DGA Flash Tank C-142 cleaning completed. Next step to install new wave guide level transmitter.
- K100 repairs progressing on schedule. Expecting completion on Friday.
- K600 packing replacement completed. After inspection, only one cylinder needed new packing.
- DGA CO2 vent welding project on schedule. Will complete on Friday after rain passes.
- K610 pressure relief valves on order. Arrival of expedited air freight expected by Friday AM.
- Booster Compressor insulation project on schedule and near completion.

Forecast:
- 3 to 6 days remaining on outage (based on 7-10 day notification/plan)
- Complete DCS battery backup project with reconfiguration of emergency power supply.
- Complete K100 cylinder installation.
- Install K610 pressure relief valves.

Pipeline Pressure at Cliffside: At 0800 (CT) Thursday, November 7 = 1158 psig

Next Report: 1500 (CT) Thursday, November 7, 2019
