Cliffside Gas Plant Status Report

Date & Time of Outage: June 25, 2020 at 1254 PM

Cause of Outage: Oil Pressure Failure on K-100

Factors Causing Restart:

• Oil Pressure Failure on K-100.
• Suspect oil pump failure.

Current Status:

• Enerflex team onsite - brought additional tooling needed for tolerance inspection.
• K100 disassembly progressing smoothly.
  o All valves being pulled and replaced.
  o All covers being removed for internal cylinder wear inspection.
  o Top cover removed to install new oil pump and check clearances on the crankshaft journals
  o Piston removed only from cylinder 2 at this time.
  o Inspection of cylinder 2 showed substantial degradation of rings and rider wear bands. Piston/rod assy to be sent in for resurfacing should be back Monday 6-29-2020
  o Parts for the rest of the K-100 service have arrived on site for the planned outage.

Forecast:

• Plant start up is TBD.

Pipeline Pressure at Cliffside: At 1400 (CT), Saturday, June 27, 2020 = 1410 psig

Next Report: 0800 (CT) Sunday, June 28, 2020
