Find the BLM map you want and, using any QR code reading application, scan that map's QR code. The link will provide a GeoPDF allowing users to track their location using GeoPDF enabled applications on smartphones and tablets. Once downloaded, it relies on the device's built-in GPS to show your location on the map, even without network or internet connection

Maps are also available online at: https://www.blm.gov/maps/georeferenced-PDFs and BLM offices.
