APPENDIX B – INVENTORY AREA EVALUATION

Evaluation of Current Conditions:

1) Document and review the existing BLM wilderness inventory findings on file, if available, regarding the presence or absence of individual wilderness characteristics, using Form 1, below.

2) Consider relevant information regarding current conditions available in the office to identify and describe any changes to the existing information (use interdisciplinary (ID) team knowledge, aerial photographs, field observations, maps, etc.), and document your findings on Form 2, below.

When Citizen Information has been submitted regarding wilderness characteristics, document the submitted materials including: date of Submission; Name of District(s) and Field Office(s) Affected; Type of material Submitted (e.g. narrative, map, photo). Evaluate any submitted citizen information regarding the validity of proposed boundaries of the unit(s), the existence of roads and other boundary features, the size of the unit(s), and the presence or absence of wilderness characteristics based on relevant information available in the office (prior BLM inventories, ID team knowledge, aerial photographs, field observations, maps, etc.)

Conduct field reviews as necessary to verify information and to ascertain current conditions. Reach conclusions on current conditions including boundaries, size of areas and presence or absence of wilderness characteristics. Fully explain the basis for each conclusion on form 2, including any critical differences between BLM and citizen information.

Document your findings regarding current conditions for each inventoried area. Describe how the present conditions are similar to, or have changed from, the conditions documented in the original wilderness inventory. Document your findings on Form 2 for each inventory area. Cite to or attach data considered, including photographs, maps, GIS layers, field trip notes, project files, etc.
**Form 1 – Documentation of BLM Wilderness Inventory: Findings on Record 2 of 3**

**Year:** 2010  
**Unit Number/Name:** OR-034-079 -- Clover Creek

**FORM 1 -- DOCUMENTATION OF BLM WILDERNESS INVENTORY FINDINGS ON RECORD**

1. Is there existing BLM wilderness inventory information on all or part of this area?

   Yes __X__ No __  

   *(If yes, and if more than one unit is within the area, list the names of those units.)*:

   **A.) Inventory Source(s) -- (X) Denotes all applicable BLM Inventory files, printed maps, or published BLM Decision documents with information pertaining to this unit.**

   **Wilderness Inventories**  
   (X) 1978 – 1979 -- BLM Wilderness Inventory Units 3-25 of OR-03-02-44 Clover Creek (unpublished BLM documents in case files)

   (X) April 1979 – *Wilderness -- Proposed Initial Inventory -- Roadless Areas and Islands Which Clearly Do Not have Wilderness Characteristics, Oregon and Washington*

   **Wilderness Decision Documents**  
   (X) August 1979 – *Wilderness Review -- Initial Inventory, Final Decision on Public Lands Obviously Lacking Wilderness Characteristics and Announcement of Public Lands to be Intensively Inventoried for Wilderness Characteristics, Oregon and Washington (green document)*

   ( ) October 1979 – *Wilderness Review -- Intensive Inventory - Oregon, Proposed Decision on the Intensive Wilderness Inventory of Selected Areas (grey document).*

   ( ) March 1980 – *Wilderness Review -- Intensive Inventory; Final Decisions on 30 Selected Units in Southeast Oregon and Proposed Decisions on Other Intensively Inventoried Units in Oregon and Washington (orange document)*

   ( ) November 1980 - *Wilderness Inventory -- Oregon and Washington, Final Intensive Inventory Decisions (brown document)*

   ( ) November 1981 *Stateline Intensive Wilderness Inventory Final Decision, Oregon, Idaho, Nevada, Utah (tan document).*

   **B.) Inventory Unit Name(s)/Number(s)**

   BLM 3-25 of OR-03-02-44 Clover Creek
C.) Map Name(s)/Number(s)
(X) Final Decision – Initial Wilderness Inventory Map, August 1979, Oregon
( ) Proposed Decision -- Intensive Wilderness Inventory of Selected Areas
Map, October 1979, Oregon
( ) Intensive Wilderness Inventory Map, March 1980, Oregon
( ) Intensive Wilderness Inventory --Final Decisions Map, November 1980, Oregon.
( ) November, 1981 Stateline Intensive Wilderness Inventory Final Decision,
Oregon, Idaho, Nevada, Utah (tan document).

D.) BLM District(s)/Field Office(s)
Vale District Office/ Malheur Field Office

2. BLM Inventory Findings on Record
(Existing inventory information regarding wilderness characteristics (if more than one
BLM inventory unit is associated with the area, list each unit and answer each question
individually for each inventory unit):

Inventory Source: See above.

H-6300-1-WILDERNESS INVENTORY MAINTENANCE
IN BLM OREGON/WASHINGTON

APPENDIX B – INVENTORY AREA EVALUATION

Evaluation of Current Conditions:

1) Document and review the existing BLM wilderness inventory findings on file, if available, regarding the presence or absence of individual wilderness characteristics, using Form 1, below.

2) Consider relevant information regarding current conditions available in the office to identify and describe any changes to the existing information (use interdisciplinary (ID) team knowledge, aerial photographs, field observations, maps, etc.), and document your findings on Form 2, below.

When Citizen Information has been submitted regarding wilderness characteristics, document the submitted materials including: date of Submission; Name of District(s) and Field Office(s) Affected; Type of material Submitted (e.g. narrative, map, photo). Evaluate any submitted citizen information regarding the validity of proposed boundaries of the unit(s), the existence of roads and other boundary features, the size of the unit(s), and the presence or absence of wilderness characteristics based on relevant information available in the office (prior BLM inventories, ID team knowledge, aerial photographs, field observations, maps, etc.)

Conduct field reviews as necessary to verify information and to ascertain current conditions. Reach conclusions on current conditions including boundaries, size of areas and presence or absence of wilderness characteristics. Fully explain the basis for each conclusion on form 2, including any critical differences between BLM and citizen information.

Document your findings regarding current conditions for each inventoried area. Describe how the present conditions are similar to, or have changed from, the conditions documented in the original wilderness inventory. Document your findings on Form 2 for each inventory area. Cite to or attach data considered, including photographs, maps, GIS layers, field trip notes, project files, etc.
FORM 2 -- DOCUMENTATION OF CURRENT WILDERNESS INVENTORY CONDITIONS

Unit Number/Name: OR-034-079 -- Clover Creek

Description of Current Conditions: [Include land ownership, location, topography, vegetation features and summary of major human uses/activities.]

1. Is the unit of sufficient size?

   Yes___ X___ No_____

   Description: Refer to this inventory unit’s associated Map 1 for its location. The unit has 11,855 acres of public land. The unit is larger than BLM’s late 1970’s inventory unit of this area. The primarily difference in acreage is that an apparent rimrock feature was part of the unit’s boundary in the late 1970’s; for this inventory maintenance the boundary is adjusted to a valid boundary feature, that being County road 551. More accurate means of determining acreage since the late 1970’s is also a factor for adjustment with this OR034-079 inventory unit.

   The unit’s boundaries are County road 551, another road traversing public lands, and private land parcels on its southwest side; BLM road 7360-0-100, another road traversing public lands, and private land on the unit’s northeast side; and private land parcels on both its north and south sides. A 320 acre inholding is also a boundary feature of the unit. The boundary roads are mechanically maintained as needed to provide for relatively regular and continuous use.

2. Is the unit in a natural condition?

   Yes____ X____ No_______ N/A_____

   Description: The unit consists predominately of the radiating short side drainages and associated moderate to steep slopes of Clover Creek, which centrally goes through the length of the unit. Elevations range from 3,1690 to 4,600 feet. Vegetation consists predominately of sagebrush, rangeland grasses, and some widely scattered juniper in the unit’s north.

   Refer to this inventory unit’s associated Map 1 and Map 2 for human imprints. There are 14.5 miles of rangeland fences, 2 earthen reservoirs and 15.9 miles of 14 motorized primitive trails (MPTs). Five of the MPTs dissect the unit’s narrow width and are distributed along much of the unit’s length. There remains no visual contrast of two disc-brush control/drilled grass seedings which occurred in 1965 and 1969. Remnant visual contrast of linear appearing disc-plowed rows are distinguishable from 2005 buck brush seedings which -- within this unit, about 1,000 acres -- are located along the southernmost boundary of the unit. The general nature of developments and their distribution...
results in the unit, overall, appearing to be affected primarily by the forces of nature with the imprint of humans substantially unnoticeable to the average visitor.

3. **Does the unit have outstanding opportunities for solitude?**

   Yes_______ No_______ X_______ N/A_______

   **Description:** The unit’s highly irregular and narrow shape, absence of vegetation screening, location of the inholding which nearly splits the length of the unit into two separate sectors, and insufficient topographic screening within settings within the narrow confines of the unit’s width precludes the unit from having outstanding opportunities for solitude.

4. **Does the unit have outstanding opportunities for primitive and unconfined recreation?**

   Yes_______ No_____ X_____ N/A_______

   **Description:** Hunting for common game species (primarily deer and some chukar) occurs in the unit. Other opportunities include hiking and general sightseeing. There are no special or unique features or activities that more so attracts visitors to the inventory unit. Individually or in combinations the unit does not possess outstanding opportunities for primitive and unconfined recreation.

5. **Does the unit have supplemental values?**

   Yes_______ X_______ No_______ N/A_______

   **Description:** Two leks of sage grouse – a BLM special status animal species – have been documented within the unit.
Summary of Findings and Conclusion

Unit Name and Number: OR-034-079 — Clover Creek

Summary Results of Analysis:

1. Does the area meet any of the size requirements?  __X__ Yes  ____No

2. Does the area appear to be natural?  ____X__ Yes  ____No

3. Does the area offer outstanding opportunities for solitude or a primitive and unconfined type of recreation?  ____Yes  __X__ No  ____NA

4. Does the area have supplemental values?  ____X__ Yes  ____No  ____NA

Conclusion -- check one:

____ The area, or a portion of the area, has wilderness character.

____X__ The area does not have wilderness character.
