### H-6300-1-WILDERNESS INVENTORY MAINTENANCE IN BLM OREGON/WASHINGTON

### **APPENDIX B – INVENTORY AREA EVALUATION**

### **Evaluation of Current Conditions:**

1) Document and review the existing BLM wilderness inventory findings on file, if available, regarding the presence or absence of individual wilderness characteristics, using Form 1, below.

2) Consider relevant information regarding current conditions available in the office to identify and describe any changes to the existing information (use interdisciplinary (ID) team knowledge, aerial photographs, field observations, maps, etc.), and document your findings on Form 2, below.

When Citizen Information has been submitted regarding wilderness characteristics, document the submitted materials including: date of Submission; Name of District(s) and Field Office(s) Affected; Type of material Submitted (e.g. narrative, map, photo). Evaluate any submitted citizen information regarding the validity of proposed boundaries of the unit(s), the existence of roads and other boundary features, the size of the unit(s), and the presence or absence of wilderness characteristics based on relevant information available in the office (prior BLM inventories, ID team knowledge, aerial photographs, field observations, maps, etc.)

Conduct field reviews as necessary to verify information and to ascertain current conditions. Reach conclusions on current conditions including boundaries, size of areas and presence or absence of wilderness characteristics. Fully explain the basis for each conclusion on form 2, including any critical differences between BLM and citizen information.

Document your findings regarding current conditions for each inventoried area. Describe how the present conditions are similar to, or have changed from, the conditions documented in the original wilderness inventory. Document your findings on Form 2 for each inventory area. Cite to or attach data considered, including photographs, maps, GIS layers, field trip notes, project files, *etc*.

### Year: <u>2018</u> Unit Number/Name: <u>OR-034-117 — Dry Creek Buttes Contiguous</u>

# FORM 1 -- DOCUMENTATION OF BLM WILDERNESS INVENTORY FINDINGS ON RECORD

#### 1. Is there existing BLM wilderness inventory information on all or part of this area?

**Yes** X No (*If yes, and if more than one unit is within the area, list the names of those units.):* 

**NOTE:** Relative to the present OR-034-117 wilderness characteristics inventory unit, only its west parcel was within the below documented inventory units of the late 1970's. Late in the 1970's inventory process – that is, at the time of WSA designation in November, 1980 – this west parcel was excluded from what was designated the Dry Creek Buttes WSA. OR-034-117's east parcel was never recognized as being administered by the BLM during the late 1970's BLM inventory. BLM review in 2017 of BLM land records confirmed that this parcel was withdrawn in 1918 and is managed by the Bureau of Reclamation (BOR) and therefore not addressed further in this updated report.

**A.) Inventory Source(s) -- (X)** Denotes all applicable BLM Inventory files, printed maps, or published BLM Decision documents with information pertaining to this unit.

#### **Wilderness Inventories**

- (X)1978-1980 BLM Wilderness Inventory Unit partially of 3-56 Dry Creek Buttes of OR-03-04-11(unpublished BLM document in case files)
- ( ) April 1979 Wilderness -- Proposed Initial Inventory Roadless Areas and Islands Which Clearly Do Not have Wilderness Characteristics, Oregon and Washington

#### **Wilderness Decision Documents**

- (X) August 1979 Wilderness Review Initial Inventory, Final Decision on Public Lands Obviously Lacking Wilderness Characteristics and Announcement of Public Lands to be Intensively Inventoried for Wilderness Characteristics, Oregon and Washington (green document)
- () October 1979 Wilderness Review Intensive Inventory Oregon, Proposed Decision on the Intensive Wilderness Inventory of Selected Areas (grey document)
- (X) March 1980 Wilderness Review Intensive Inventory; Final Decisions on 30 Selected Units in Southeast Oregon and Proposed Decisions on Other Intensively Inventoried Units in Oregon and Washington (orange document)
- (X) November 1980 Wilderness Inventory Oregon and Washington, Final Intensive Inventory Decisions (brown document)
- () November 1981 Stateline Intensive Wilderness Inventory Final Decision, Oregon, Idaho, Nevada, Utah (tan document)

### **B.)** Inventory Unit Name(s)/Number(s)

BLM partially of 3-56 Dry Creek Buttes of OR-03-04-11

#### C.) Map Name(s)/Number(s)

- (X) Final Decision Initial Wilderness Inventory Map, August 1979, Oregon
- ( ) Proposed Decision -- Intensive Wilderness Inventory of Selected Areas Map, October 1979, Oregon
- (X) Intensive Wilderness Inventory Map, March 1980, Oregon
- (X) Intensive Wilderness Inventory -- Final Decisions Map, November 1980, Oregon
- () November, 1981 *Stateline Intensive Wilderness Inventory Final Decision, Oregon, Idaho, Nevada, Utah* (tan document)

#### **D.) BLM District**(s)/Field Office(s)

Vale District / Malheur Field Office

#### 2. BLM Inventory Findings on Record

(Existing inventory information regarding wilderness characteristics (if more than one BLM inventory unit is associated with the area, list each unit and answer each question individually for each inventory unit):

Unit#/ Name	Size (historic acres)	Natural Condition? Y/N	Outstanding Solitude? Y/N	Outstanding Primitive & Unconfined Recreation? Y/N	Supplemental Values? Y/N
Partially of 3-56 Dry Creek Buttes of OR- 03-04-11	53,720*	Y*	Y*	Y*	Y*
TOTAL	53,720				

#### Inventory Source: See above.

\* -- Only a portion of this acreage constitutes the present OR-034-117 unit; and, of the present OR-034-117 unit, only its west parcel (2,427 acres) was included in this late 1970's unit. Also see "**NOTE**" under "1.", above.

The inventory of this unit was updated in 2010. However, findings are being replaced by this current 2018 inventory review. Documentation of the 2010 inventory can be found in the wilderness inventory project record.

### H-6300-1-WILDERNESS INVENTORY MAINTENANCE IN BLM OREGON/WASHINGTON

### **APPENDIX B – INVENTORY AREA EVALUATION**

### **Evaluation of Current Conditions:**

1) Document and review the existing BLM wilderness inventory findings on file, if available, regarding the presence or absence of individual wilderness characteristics, using Form 1, below.

2) Consider relevant information regarding current conditions available in the office to identify and describe any changes to the existing information (use interdisciplinary (ID) team knowledge, aerial photographs, field observations, maps, etc.), and document your findings on Form 2, below.

When Citizen Information has been submitted regarding wilderness characteristics, document the submitted materials including: date of Submission; Name of District(s) and Field Office(s) Affected; Type of material Submitted (e.g. narrative, map, photo). Evaluate any submitted citizen information regarding the validity of proposed boundaries of the unit(s), the existence of roads and other boundary features, the size of the unit(s), and the presence or absence of wilderness characteristics based on relevant information available in the office (prior BLM inventories, ID team knowledge, aerial photographs, field observations, maps, etc.)

Conduct field reviews as necessary to verify information and to ascertain current conditions. Reach conclusions on current conditions including boundaries, size of areas and presence or absence of wilderness characteristics. Fully explain the basis for each conclusion on form 2, including any critical differences between BLM and citizen information.

Document your findings regarding current conditions for each inventoried area. Describe how the present conditions are similar to, or have changed from, the conditions documented in the original wilderness inventory. Document your findings on Form 2 for each inventory area. Cite to or attach data considered, including photographs, maps, GIS layers, field trip notes, project files, *etc*.

# FORM 2 -- DOCUMENTATION OF CURRENT WILDERNESS INVENTORY CONDITIONS

### Unit Number/Name: <u>OR-034-117 — Dry Creek Buttes Contiguous</u>

**Description of Current Conditions:** [Include land ownership, location, topography, vegetation features and summary of major human uses/activities.]

#### 1. Is the unit of sufficient size?

Yes X No

**Description:** Refer to this inventory unit's associated Map 1 for its location. At the time of the BLM late 1970's WC inventory, the north, east and south boundary of the present west parcel of OR-034-117 was a series of connected short road segments (at the time, partially associated with a water pipeline/trough system) which served as boundary features for the Dry Creek Buttes WSA. The pipeline/troughs in this location have not been in functioning condition for many years, now. Since the late 1970's, these road segments have changed status to motorized primitive trail (MPT) due to no mechanical maintenance conducted and with no BLM intention of conducting such maintenance on the routes in the future (including that portion of the same routes which were - in 1980 -recognized as cherry-stem roads with the OR-3-56 Dry Creek WSA). Thus, this west parcel is now contiguous with the Dry Creek Buttes WSA. The west boundary of this west parcel of OR-034-117 is a road crossing BLM which generally parallels BLM road 7320-0-00 located just to the west of it. This west boundary road of the west parcel is mechanically maintained as needed to provide for relatively regular and seasonally continuous use. In summary, OR-034-117 is contiguous to the WSA and meets size criteria for wilderness characteristics.

**NOTE:** OR-034-116 is presently associated with Dry Creek Buttes WSA, with the entire designated WSA determined by BLM in 1991 as not being suitable and/or manageable for designation as Wilderness by Congress. However, matters of suitability and manageability are not factors of consideration for wilderness characteristic inventory.

### 2. Is the unit in a natural condition?

Yes X No N/A \_\_\_\_

**Description:** Vegetation of is predominately a mix of sagebrush with native and nonnative grasses. The parcel consists of the upper shallow, east-flowing drainages of Acton Gulch with terrain of very low profile. Elevations of range from 3,640 to 3,800 feet. The parcel is characterized by moderate to very steep slopes from the conservation pool level of Owyhee Reservoir to its west and north boundary against the WSA; elevations range from approximately 2,740 to 2,960 feet.

The east parcel is within the Owyhee Views Area of Critical Environmental Concern (ACEC). A relevant and important value of the ACEC associated with this parcel is the

high scenic values associated with the ACEC's virtually unaltered landscape. The west parcel of this OR-034-117 inventory unit is partially within the Hammond Hills Sand Hills ACEC/Research Natural Area (RNA). The ACEC/RNA's relevant and important values are the big sagebrush-antelope bitterbrush/Indian ricegrass and big sagebrush-greasewood/Indian ricegrass vegetation cells identified by the Oregon Natural Heritage Program.

Refer to this unit's associated Map 1 for human imprints. There are no human developments within the parcel which is contiguous with the natural conditions of the adjoining Dry Creek Buttes WSA.

There are 9.8 miles of 7 MPTs (including the routes which were originally – in 1980 -determined cherry-stem roads associated with Dry Creek Buttes WSA), one earthen reservoir, and 4.3 miles of two buried water pipeline systems with 3 trough locations (the system has been abandoned for several years). In consideration of the minimal presence and type of developments associated with the west parcel -- affected primarily by the forces of nature with the imprint of humans being substantially unnoticeable to the average visitor. This natural condition is further enhanced by the continuing natural condition of the contiguous WSA.

### 3. Does the unit have outstanding opportunities for solitude?

Yes X No N/A \_\_\_\_

**Description:** The parcel being of small acreage, does not provide for outstanding opportunities for solitude. However, being contiguous with the WSA which does possess outstanding opportunities for solitude, the unit in combination with the WSA takes on a continuum of landscape area which, overall, provides for outstanding opportunities for solitude. Within the parcel, solitude is occasionally somewhat dampened by the unavoidable occasional outside sight and sounds of motorized boating on Owyhee Reservoir (east parcel), and by outside motorized vehicle travel on the road on the west parcel's west boundary road.

### 4. Does the unit have outstanding opportunities for primitive and unconfined recreation?

Yes X No N/A

**Description:** Being contiguous with the WSA, certain outstanding opportunities for primitive and unconfined recreation associated with the WSA are also available within the parcel of this inventory unit in combination with the WSA. The most noted example is a continuum of outstanding hiking opportunities. Although within a much larger area utilized by bighorn sheep – a prized trophy hunting game species in Oregon – there have been no recorded sightings of the species in this inventory unit. Other activities available but not outstanding associated with the parcel include hunting of common game species (primarily deer and chukar), nature photography, horseback riding, and wildlife viewing.

## 5. Does the unit have supplemental values?

3 of 4

Yes X No N/A

**Description:** The parcel is within bighorn sheep habitat area. However, the parcel is barely within the sheep's identified habitat area, and with no recorded sightings of the sheep within the parcel. The location and terrain within in the parcel is not as conducive or preferred by what very few sheep –if any – which presently may get this far north and west within the sheep's identified habitat area. (The few sheep in the larger habitat area have and continue presently to occupy public lands substantially south [of the west parcel of OR-034-117] and within the Dry Creek Buttes WSA [in the WSA's Red Butte area].) Northern bald eagles pass through the area on their annual spring and fall migrations. The species was delisted in June 2007 from under the federal Endangered Species Act; however, per current (since 12/12/2008) BLM management direction, BLM identifies delisted species to be conserved as BLM sensitive species for 5 years following delisting by the federal Fish and Wildlife Service.

# **Summary of Findings and Conclusion**

Unit Name and Number: <u>OR-034-117 — Dry Creek I</u>	Buttes Contig	uous	
Summary Results of Analysis: 1. Does the area meet any of the size requirem	ents? <u>X</u>	Yes	_No
2. Does the area appear to be natural?	_X	_Yes	No
3. Does the area offer outstanding opportunitie and unconfined type of recreation?	es for solitude <u>X</u> Yes	-	
4. Does the area have supplemental values?	X_Yes	No	NA
Conclusion check one:			
X The area, or a portion of the area, h	as wilderness	character.	
The area does not have wilderness ch	aracter.
