Cliffside Gas Plant Status Report

Date & Time of Outage: December 3, 2020 at 2330 CT

Cause of Outage: Cold Box Trip

Factors Causing Restart:

• Process swinging instability lead to trip of Cold Box on temperature limit. (Low limit on loop 2074).

Current Status:

• Operations started production into the pipeline about 6:00 AM this morning.
• The plant is back up and running.
• DGA system running normally at full temperature.

Forecast:

• Operate and produce into the pipeline as needed. Allocations may not be needed as pressure is slowly rising.

Pipeline Pressure at Cliffside: At 0830 (CT), Wednesday, December 9, 2020 = 923 psig

Next Report: Final Report for this instance.
