California Public Lands

National System of Public Lands

About BLM California

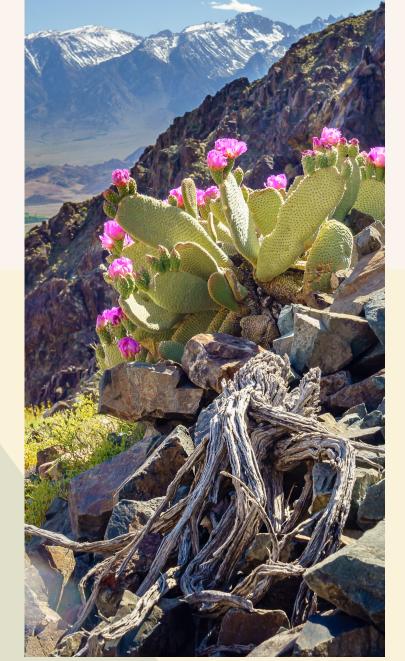

California is one of the most diverse states in the nation with public lands extending across rangelands, forests, high mountains, deserts, and coast.

The abundance of natural resources on public lands managed by the Bureau of Land Management throughout California supports a multiple-use mission, while providing important economic benefits to California and the nation.

In California, the BLM has a strong history of meeting the nation's growing renewable energy needs and often sets the standard for sustainable development, while ensuring our natural, recreational, historical and cultural resources will be available for future generations.

BLM California oversees:

- 15 million acres of public land (about 15% of the Golden State's land mass)
- · 47 million acres of subsurface mineral estate
- · 1.6 million acres of public land in northwestern Nevada

7.5 Million Visits by campers and hikers on public lands

25,192 Miles of off-highway vehicle routes on public lands

1,759 Miles of designated trails including 696 miles of nationally designated trails

1.8 Million Visitors participate in educational and interpretive programming

\$109.3 Million
Rent and royalties reinvested from energy production on public lands

116 Miles of wild and scenic rivers

109 Tribal Nations in California engaged through BLM programs and partnerships in 2021

6 Million Acres of permitted livestock grazing on public lands

+\$40.5 Million
Revenue from solar, wind and geothermal sites on public lands

9,280 Wildfires fought on public lands in California

9.3 Million Barrels of oil and 6.8 billion cubic feet of natural gas produced on public lands

The BLM's mission is to sustain the health, diversity, and productivity of public lands for the use and enjoyment of present and future generations.

To achieve these goals, we cultivate community-based conservation, citizen centered stewardship and partnership through consultation, cooperation, and communication.

National Conservation Lands

BLM's National Conservation Lands recognize and protect some of the West's most spectacular natural and historical areas. Overall, BLM California manages approximately 10 million acres of National Conservation Lands. The BLM is working to support conservation of 30 percent of lands and waters by 2030.

- · 10 Wild and Scenic Rivers
- 3 National Historic Trails, 1 National Scenic Trail
- 7 National Monuments, 1 National Conservation Area,
 1 National Scenic Area
- 1 Outstanding Natural Area, 1 Forest Reserve
- · 92 Wilderness Areas, 63 Wilderness Study Areas

Recreation Access

Public lands in California offer a variety of recreational opportunities: hunting, fishing, hiking, OHV use, mountain biking, horseback riding, boating, and backcountry exploring.

- 735,000 acres open for OHV use, including the world-renowned Imperial Sand Dunes Recreation Area
- · 6.3 million visitors participate in OHV recreation
- 14 million acres open to hunting
- · 350 miles of river open to fishing
- 189 miles of the Pacific Crest Trail
- 617 recreation sites and areas

Responsible Energy Development

BLM-managed public lands make significant contributions to the nation's energy goals. BLM California manages an extensive renewable energy program that supports America's Clean Energy Future, including solar, geothermal, and wind energy.

- · 66 authorized solar, wind, and geothermal facilities
- · 9,000 megawatts of electricity
- · Enough energy to power 2.78 million homes

Wildfire & Fuels Management

The BLM fire program carries out a broad range of actions to protect communities, recreation areas, wildlife habitat and other resources. In California, the changing climate, coupled with historic drought and an abundance of hazardous fuels have led to an increased fire risk.

- 13.6 million acres directly protected by the BLM in California and northwestern Nevada
- 350 fire staff employed in various positions, including suppression, fire prevention and fuels reduction programs

The BLM fuels treatment programs are focused on restoring landscapes through collaborative, locally led, incentive-based practices that create jobs and reduce the catastrophic wildfire threat.

· 25,000 acres of fuels treatments
