Measuring a Cord

![Diagram of cord measurements]

Number of Cords = \( \text{length} \times \text{width} \times \text{height} \) + 128

Firewood is commonly measured in cords. A standard cord is the amount of lightly piled wood in a stack 4 feet wide by 4 feet high by 8 feet long.

The average half-ton pickup truck can carry a half cord of dry wood without overlapping the vehicle.
