This booklet contains statistics about the Bureau of Land Management in Oregon and Washington. Most of the figures pertain to fiscal year 1976 (July 1, 1975 to June 30, 1976). For comparison, data for the preceding year are usually listed, too. In a few cases, it has been more appropriate to list data on a calendar year basis.

FOREST DEVELOPMENT - II

Reforestation treatments made for the purpose of protecting unestablished stands from animals, insects, and disease are tabulated under "Protection." Reforestation treatments made to release unestablished stands from competing vegetation are tabulated under "Release." All acres reported are commercial forest land.

As the Nation's principal conservation agency, the Department of the Interior has responsibility for most of our nationally owned public lands and natural resources. This includes fostering the wisest use of our land and water resources, protecting our fish and wildlife, preserving the environmental and cultural values of our national parks and historical places, and providing for the enjoyment of life through outdoor recreation. The Department assesses our energy and mineral resources and works to assure that their development is in the best interests of all our people. The Department also has a major responsibility for American Indian reservation communities and for people who live in Island Territories under U.S. administration.
