Subject: Kirkland Mine

Hi Rem,

The Arizona Department of Health Services is working with the Arizona Department of Environmental Quality to respond to community concerns regarding the Kirkland mine in Skull Valley.

I know the Bureau was working on putting together a report of the sites, and I wanted to follow up to see whether that report was available. If not, any information you could provide about the site – especially relating to the presence (if any) of erionite – would be very helpful.

Thank you!

Kayla
