Newt:

Meeting Format:

We're looking at a bit of a hybrid. We'd like to start with presentations to the public, entertain questions or statements from the public if necessary (which I expect it will be), then transition the open house.

Initially, we would like the room set up with the stations for the different parties and resource specialists initially in the front and back of the room (just to maximize space), with theater style seating. To initiate the meeting, the facilitator would start with introductions (of the proponents, any officials, and the BLM and EPG teams). If County Supervisor Rowle Simmons is there or any other officials we should let them speak if they wish. Then the facilitator will introduce the presentation to the public by the proponent (to discuss the project description), and then a presentation by BLM (me) to discuss the process. I'll let people know that the way to learn more about the project and ask questions will be through the open house forum at the stations with experts, and then I'll hand the microphone to the facilitator.

If we can transition straight to the open house, great. However, I think some people are going to insist on making a public statement or asking questions in front of the whole group. If that's the case, then we want to let them. We want people to feel they were heard. (Let's skip writing public issues on a flip chart during that time.) The facilitator and we will transition to the open house portion when we can.

When we transition to the open house part, the facilitator will need to ask people to move and stack their chairs (we'll need to find out where they should be stacked), and then move the stations for the different parties and resource specialists around the perimeter of the room. The rest of the meeting would be open house style.

Scope of the EA: (I'll owe you this next week.)

Thank you, Rem. We will move forward with the meeting under this direction. I'll look for the resource information next week.
Have a great weekend,
Newt

Subject: RE: Tuesday, June 23 Skull Valley Meeting

Hello Everyone,

I would like to thank Rem, Fred and Cobey for attending the Yavapai County Board of Supervisors meeting today. We actually were able to stream it live to view, and listen to the agenda regarding KMC mine. After careful consideration we believe that it would be beneficial and a better use of our funds if we address the overall issue of the 320 acres and not just the stockpile.

The time and cost of the stockpile is not cost or time effective if we look at it on a smaller scale. We would still have to go through this again on the 320 acre MPO. We have decided to put together an EA and a phase structured MPO for the entire 320 acres.

I realize there has been a lot of time and consideration spent on the stockpile especially from KMC end as far as money spent. However, the circumstances of the public input has given us enough indication that we have to address the issues upfront now and for the overall project.

Based on what we have learned we would like some guidance from the BLM as to whether or not an EA will be sufficient for a small 320 acre mining operation or will this require an EIS? I would like to plan another meeting with BLM so we can outline and discuss how to move forward.

Also need to address the meeting on June 23 2015. Do we still need to plan on this meeting? We appreciate the efforts of all involved and look forward to a continued working relationship.

Areta: In talking about addressing the entire 320 acres, we agree that developing the new plan of operations is a good strategy. We also believe that an EA will be sufficient to address the issues, rather than an EIS. Considering that you will need a new plan of operations to address the larger area, let's definitely postpone the meeting that we talked about having on June 23.
