**Subject:** Kirkland - Carcinogens text

My conversation with Areta went fine. She agrees with doing monitoring for airborne carcinogens, which include asbestos minerals and erionite. She just doesn't want to call out asbestos and erionite specifically when we don't call out all carcinogens. I agreed that the text of the plan modification we requested in our letter, request #4, could read: "Air Quality to include at least annual monitoring for airborne carcinogens, specifically bulk geochemical testing of product as well as in-situ testing of exposed layers in pit as pit depth progresses." (and leave off "for asbestos minerals and erionite"). ~Rem
