

Memo to Hillcamp File 10/15/2004

From : Les Boothe , RMS

The Standards and Guidelines assessment stated that Standard 2 was not being met because of three Springs and their associated riparian areas. The S&G's described the work necessary to correct the problems at Hidden Spring, Game spring and Tim Spring. This work was done with exclosures being enlarged and the over flow problems at Game spring corrected. These projects have corrected the problems and Standard 2 is now being met on the Hillcamp allotment.
