

Year: 2018

Inventory Unit Number/Name: OR-015-030A/ Goodrich Well North

FORM 1

DOCUMENTATION OF BLM WILDERNESS INVENTORY FINDINGS ON RECORD

1. Is there existing BLM wilderness inventory information on all or part of this area?

No Yes X (if more than one unit is within the area, list the names/numbers of those units):

a) **Inventory Source:** BLM Wilderness Inventory files for Pacific Power and Light Company (PP&L) Transmission Line: PP&L Roadless Area Inventory Files (1977).

b) **Inventory Unit Number(s)/Name(s):** OR- 010-01-04 (1-30)/ Goodrich Well

c) **Map Name(s)/Number(s):** Wilderness Review – Initial Inventory: Final Decision on Public Lands Obviously Lacking Wilderness Characteristics and Announcement of Public Lands to be Intensively Inventoried for Wilderness Characteristics; USDI BLM - Oregon and Washington, August 1979.

d) **BLM District(s)/Field Office(s):** Lakeview District, Lakeview Resource Area.

2. BLM Inventory Findings on Record:

Existing inventory information regarding wilderness characteristics (if more than one BLM inventory unit is associated with the area, list each unit and answer each question individually for each inventory unit):

Unit#	Size (historic acres)	Natural Condition? Y/N	Outstanding Solitude? Y/N	Outstanding Primitive & Unconfined Recreation? Y/N	Supplemental Values? Y/N
1-30	9,600	N	N	N	N/A
1-30A*	6,441	N	N/A	N/A	N/A

*The inventory of this unit was updated in 2012. However, due to a State Office-sponsored Wilderness Inventory Consistency Evaluation and subsequent guidance, the 2012 inventory analysis and findings are being replaced by this current 2018 inventory review. Documentation of the 2012 inventory can be found in the wilderness inventory project record.

Summarize any known primary reasons for prior inventory findings listed in this table:

In 1977/78 historic Unit 1-30 was described as a rolling hills and ridges with a couple of rims in the northeast. Vegetation consisted of desert shrubs with a small crested wheatgrass seeding in the southern portion of the area. A couple of fence lines were noted. Several “ways” entered the unit and were visible from much of the area. Well development was noted on adjacent private lands. Other outside intrusions included a gravel county road to the north which could be seen from much of the unit. No opportunities for solitude were identified. Hiking and hunting were noted, but were found to be less than outstanding.

FORM 2

**DOCUMENTATION OF CURRENT WILDERNESS INVENTORY
CONDITIONS**

Unit Number/Name: OR-015-030A/ Goodrich Well North

(1) Is the unit of sufficient size? Yes No

Between 2007 and 2016, BLM staff conducted field inventory in the area as part of a process to update its road and wilderness inventories and to gather additional information to supplement ONDA’s wilderness information. This fieldwork included photo documentation of the boundary and interior routes and a re-evaluation of wilderness characteristics for this area. Using both ONDA and BLM photos, field logs, and staff field knowledge, the BLM completed route analysis within the area in 2017.

The BLM determined that the inventory unit is bounded by BLM road 6164-00 to the east; BLM interim road 6164-DB and a right-of-way for a Bonneville Power Administration power line to the south; private lands to the west; a right-of-way for County Road 5-14 and private lands to the north. Due to changes in boundary determinations (roads and power line rights-of-ways buffer corrections) approximately 83 acres were removed from the unit.

Thus, based on these boundary and road determinations, the BLM found the Goodrich Well North inventory unit to exceed the minimum size criteria at approximately 6,359 acres of BLM-administered lands.

Additional background on the process the BLM followed during this evaluation is contained in the document, *Wilderness Inventory Maintenance Process for the Lakeview Resource Area, BLM* and in the *Route Analysis Forms*. Both documents can be found in the wilderness inventory file.

DESCRIPTION OF CURRENT CONDITIONS:

This unit is located approximately 16 miles northwest of Alkali Lake, Oregon. It is approximately 4 miles long by 3.75 miles wide. Topographically, the unit consists of a few rolling hills (75-250 ft. high), rims (50-150 ft. high), drainages (10-30 ft. deep), and one main butte (500 ft. high) in the southern third of the unit. The northwest and northeast portions of

the unit are relatively flat. Overall, the unit ranges in elevation from 4,355 to 5,175 feet. Vegetation is comprised of sagebrush and grasses.

(2) Is the unit in a natural condition? Yes No N/A

In 1977/78, historic Unit 1-30 was found to be in an unnatural state due primarily to outside influences. Internal impacts included a seeding, a couple of fence lines, and several “ways” entered the unit and were visible from much of the area. Outside intrusions to naturalness included a well development and a gravel county road to the north which could be seen from much of the unit.

The unit currently contains the following man-made developments/disturbances: 3,935 acres of seeding, 3,653 acres of wildfire, 7 miles of fence, 4.25 miles of reclaimed routes, 0.25 miles of motorized routes, and 1 rehabbed gravel pit (1 acre).

Presently, almost 4 decades after the original inventory, these developments are weathered and grown over with herbaceous grasses and sagebrush. As a result, developments now fade into the background of the unit and are largely only noticeable at a close distance (1/4th mile or less) and are thus substantially unnoticeable from further distances. Furthermore, many of the disturbances are located near the perimeter of the unit and, as such, have a small area of influence. Additionally, areas that were seeded or allowed to revegetate naturally have returned to a natural, post fire, appearing condition

Based on a review of all the available information including photos, staff knowledge, and field review, the BLM concluded that the unit appears in a natural condition where the imprints of man are substantially unnoticeable.

(3) Does the unit (or the remainder of the unit if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) have outstanding opportunities for solitude? Yes No N/A

In 1977/78, historic Unit 1-30 was found to lack outstanding opportunities for solitude.

The BLM acknowledges that there are limited opportunities for solitude within the Goodrich Well North inventory unit. Topographically, the unit consists of a few rolling hills (75-250 ft. high), rims (50-150 ft. high), drainages (10-30 ft. deep), and one main butte (500 ft. high) in the southern third of the unit. The northwest and northeast portions of the unit are relatively flat. Overall, the unit ranges in elevation from 4,355 to 5,175 feet. Vegetation is comprised of sagebrush and grasses. These opportunities are less than outstanding as the area’s characteristic landscape lacks vegetative screening and existing topographic screening is insufficient to effectively allow those recreating in the area to avoid the sights and sounds of others.

Thus, for the reasons specified above and based on a review of all the available information including (BLM and citizen provided) photos, staff knowledge, and field review, the BLM

concluded the Goodrich Well North inventory unit does not possess outstanding opportunities for solitude.

(4) Does the unit (or the remainder of the unit if a portion has been excluded due to unnaturalness and the remainder is of sufficient size) **have outstanding opportunities for primitive and unconfined recreation?** Yes _____ No X N/A _____

In 1977/78, historic Unit 1-30 hiking and hunting were noted as possible opportunities, but were found to be less than outstanding.

The BLM finds the unit offers limited opportunities for hiking, horseback riding, backpacking, camping, wildlife observation, exploration, scenery, photography, stargazing, trapping, and hunting. However, the BLM determined that the unit does not possess outstanding opportunities for primitive and unconfined recreation through either the diversity of recreational activities possible in the area or by the outstanding quality of one opportunity relative to opportunities found within the Lakeview Resource Area.

(5) Does the unit have supplemental values? Yes _____ No _____ N/A X

Supplemental values were not evaluated as the unit was determined to lack both outstanding opportunities for solitude and or primitive and unconfined recreation, and therefore does not meet the minimum wilderness criteria.

Summary of Findings and Conclusion

Unit Number/Name: OR-015-030A/ Goodrich Well North

Summary Results of Analysis:

1. Does the area meet the size requirements? Yes No
2. Does the area appear to be natural? Yes No
3. Does the area offer outstanding opportunities for solitude or a primitive and unconfined type of recreation? Yes No NA
4. Does the area have supplemental values? Yes No NA

Conclusion (Check One):

The area- or a portion of the area- has wilderness character:
(items 1, 2 and 3 must be checked "yes").

The area does not have wilderness character: *(any of items 1, 2 and 3 are checked "no").*
