Wildings/ Transplants (Personal Use/Commercial - 10 foot height maximum)	Each	\$5.00	Any	---	---
Plant Specimen Whole or Part Common	Each	\$.10	Any	---	---

Product ²	Unit of Measure	Minimum Price	Dimension	TSIS Conversion Factor BF	TSIS Conversion Factor CF
Plant Specimen Whole or Part Rare	Each	\$1.00	Any	---	---
Boughs (Commercial) <i>Minimum Permit purchase of \$20.00 for a standard pickup load (4'x8' x2' box).</i>	Pound	\$0.05	6-7 lbs./ CF	--	64
House Logs	Board Foot	\$.02	Scribner Dec. C	5.0BF/1CCF	.20CF/1BF
Seed (grass, forbs, sagebrush, etc.)	Pounds	10%	Commercial Value ⁸	---	---

No Permit or Contract is required for the following Personal, Non-Commercial Uses of renewable resources. (43 CFR 8365.1-5) This section allows for the collection of reasonable amounts of commonly available, renewable resources such as flowers, berries, nuts, seeds, cones and leaves for noncommercial use. The following table establishes the reasonable quantities for each product.

<u>Special Forest Product</u>	<u>Unit of Measure</u>	"Personal Use Only" Reasonable Amount per <u>Person per Year</u>
Berries - All Species	Gallon	5 per Species
Cones -Ornamental	Bushel	2
Cones or Other Native Seed	Bushel	1
Boughs/Greenery	Pound	25
Moss	Pound	25
Mushrooms - All Species	Gallon	5 per Species

¹ Several Field Offices have noted that their current index price for forest products is higher than the minimum price list. No attempt is being made to establish a maximum price for any forest product. The local forest products appraiser may establish a higher price for any forest product when based on a local market appraisal. These minimum prices are to be used when no better market data is available. Field Offices experiencing strong demands for forest products should appraise those products to establish their local fair market value.

² Minimum prices for these products applies to Personal and Commercial Uses. The minimum purchase price for a commercial Christmas tree permit is \$60.00. Biomass is in Green Tons, with approximately 40% moisture content.

³ Includes sawtimber, mine timbers, ties, large and small poles.

⁴ The conversion is 1 MBF = 2.0 CCF or 1000 BF/5.0 = 200 CF. This conversion factor may be used when an actual cruise conversion is not available and the conversion factors in the USFS Region 2 Appraisal Bulletins are not applicable.

⁵ All forest products will be sold at or above the State Minimum Price listed for that product unless one of the following criteria is met:

- 1- The authorized officer determines and documents in the official case file that either the net positive benefits to other resources such as forest health, recreation, wildlife, watershed, etc., will occur and that existing forest productivity will not be degraded, or
- 2- An appraisal determines that fair market value is less than the established minimum price.

⁶Minimum purchase amount for burl wood is $1/4$ cord or 20 cubic feet.

⁷Character wood is wood with distinctive characteristics such as, but not limited to, unique insect galleries in the wood, fire scars/cat faces, bowls in the trunk/main stem or limbs or grows in and unconventional manner that makes it desirable in the making of unique and/or unconventional wood products such as but not limited to furniture, log cabin home construction or large gate entrances for homes and ranches.

⁸Commercial value determined by BLM seed warehouse current prices (I.M. 2013-176) , if seed is not priced by warehouse then minimum is set at \$.10 per pound.
