Clark Canyon	4,927	Y	Y	Y	Y

## OR-054-014/ Clark Canyon Inventory Unit

### Conclusion

#### Check One:

Area reviewed lacks sufficient size and does not meet one of the exceptions for small size.

The area-or a portion of the area-has wilderness character.

The area does not have wilderness character.

(1) Describe current conditions: (Include boundary features, land ownership, size, location, topography, vegetation features and summary of major human uses/activities).

The inventory unit is located in Wheeler County, Oregon, approximately 3 miles east of the community of Twickenham. The unit is bordered to the west by the Wheeler County paved road (Girds Creek Road), and on all other sides by private land. The unit is separated from the Sutton Mountain WSA by Girds Creek Road. The unit contains one 40 acre inholding. The unit is 4,927 acres in size and does not meet any of the exceptions for small size, however the BLM believes the area is of sufficient size and shape to be effectively managed to protect wilderness characteristics.

This area was included in the Sutton Mountain Roadless Area review completed by the Central Oregon Resource Area, Prineville District BLM, in 1994. The lands were labeled Area D in 1994, at which time these lands were dropped from further review and not carried forward to a wilderness inventory process. The review described the Area D as:

“Horse Mountain is less than 5,000 acres and is separated from the rest of the Sutton Mountain area by Girds Creek Road which is a county paved road.”

**Location of Unit:** Portions of or all public lands in T 9 S., R 22 E., Sections 27, 28, 32, 33, 34; T 10 S., R 22 E., Sections 3, 4, 5, 7, 8, 9, 10; T 10 S., R 21 E., Sections 11, 12, 14.

The Clark Canyon Inventory Unit consists of two side canyons that flow generally north into the John Day River, and the rugged ridge located between them. The side canyons, Clark and Dead Dog host ephemeral streams that over time have created a combination of wide cobble washes interspersed with narrow constrictions containing sheer rock walls and ephemeral waterfalls. The ridge between the two canyons tops out at 3,500 feet in elevation on a grassy plateau. Dropping off from the plateau is a system of spring-laden side canyons and draws that eventually empty into the John Day River 2000 feet below. The unit includes about a mile of river frontage split into four short sections.

**Vegetation:** The dominant vegetation is sagebrush and juniper woodland, with slopes of bunchgrass and cheatgrass, and rock outcrops covered in mountain mahogany. Mosses and lichens line the rock walls and waterfalls of the canyons and their tributaries. A Bureau-listed “Species of Concern” *Thelypodium eucosmum*, arrow-leaf thelypody, is found in the unit. In addition, two cactuses are found in the unit including hedgehog cactus, which provide an appealing floral display during spring.

## OR-054-014/ Clark Canyon Inventory Unit

Man-Made Improvements: The unit contains approximately 1 mile of fencing and one mile of two-track way. There are no other known improvements.

Current Land Uses: Some of the lands have been leased for potential oil and gas development (BLM Oil and Gas Leases 3/3/1999, 9/5/2001, 12/04/2002, 12/11/2003). The lands are authorized for commercial grazing under BLM permit (Dead Dog Allotment #2537). Public access is available from several popular boat-in river campsites within the unit. Overland public access is possible from the paved Gird's Creek Rd. west of the unit, though challenging without a marked trail. Recreational uses include day hiking and nature study as part of John Day River float trips, and big game and upland bird hunting, also accessed from the river. The Visual Resource Management Class of the unit is Class II.

Wildlife populations include mule deer, elk, mountain lion, bobcat, chukar, golden eagle, prairie falcon, California quail, meadowlarks and mountain bluebird.

No cultural inventories have been conducted within the inventory unit. Historically, the area was used to graze stock – cattle, sheep and horses. At least one historic cabin is located within the unit.

(2) Is the unit in a natural condition?

Yes  No  NA

Description: The unit appears to be in a natural condition.

(3) Does the unit have outstanding opportunities for solitude?

Yes  No  NA

Description: The intricate system of canyons and side canyons would provide outstanding opportunities for solitude.

(4) Does the unit have outstanding opportunities for primitive and unconfined recreation?

Yes  No  NA

Description: The unit would provide outstanding opportunities for primitive and unconfined recreation such as hunting, hiking, backpacking and backcountry exploration.

(5) Does the unit have supplemental values?

Yes  No  NA

Description: One historic cabin is known to exist in Dead Dog Canyon, and there may be others.

Christina M. Welch  
Field Manager

Oct. 31, 2007  
Date

*This form documents information that constitutes an inventory finding on wilderness characteristics. It does not represent a formal land use allocation or a final agency decision subject to administrative remedies under either 43 CFR parts 4 or 1610.5-2.*

## OR-054-014/ Clark Canyon Inventory Unit

### PURPOSE:

This addendum provides signatory authority across gaps in supervisory oversight in the preparation process.

### DISCUSSION:

Further study has been conducted to validate the findings approved by the original signator, Christina Welch. As the new Field Manger for the Resource Area and Ms. Welch's replacement I have been briefed by the specialists assigned on the contents and underlying rationale for the findings contained in this document. I approve these findings with my signature below.

### APPROVED BY:

**John Day Basin RMP Road Analysis Form**

(Factors to consider when determining whether a route is a road for wilderness inventory purposes.)

**Wilderness Inventory Area Name and Number (UNIT\_ID): Clark Canyon (OR-054-014)**

**Route Name and/or Identifier: Unkown Ridge Road (Labeled as "A" on Map 1)**

**I. LOCATION:** Please refer to attached map and BLM corporate data (GIS). Route begins in T 10 S, R 22 E, Section 9, SE ¼ and travels to the northwest along a ridge for approximately one mile, dropping in elevation and ending at the termini of the ridge.

**II. CURRENT PURPOSE OF ROUTE:** The route comes off of private land and the purpose is unknown. It may be used by the adjacent private landowner for hunting access or by the grazing permittee to turn-out or gather cattle.

**III. ROAD RIGHT-OF-WAY:**

Yes \_\_\_ No X Unknown \_\_\_

**IV. CONSTRUCTION**

Yes \_\_\_ No X

Examples:

Paved \_\_\_ Bladed \_\_\_ Graveled \_\_\_ Roadside Berms \_\_\_  
Cut/Fill \_\_\_ Other \_\_\_

**V. IMPROVEMENTS**

Yes \_\_\_ No X

By Hand Tools \_\_\_ By Machine \_\_\_

Culverts \_\_\_ Stream Crossings \_\_\_ Bridges \_\_\_ Drainage \_\_\_ Barriers \_\_\_ Other \_\_\_

**VI. MAINTENANCE:**

A. Is there Evidence or Documentation of Maintenance using hand tools or machinery?

Yes \_\_\_ No X

Hand Tools \_\_\_(Y/N)\_\_\_ Machine \_\_\_(Y/N)\_\_\_

OR-054-014/ Clark Canyon Inventory Unit

Explain: See BLM FAMS data in reference section. Is the route scheduled to receive maintenance? No

B. If route is in good condition, but there is no evidence of maintenance, would mechanical maintenance with hand tools or machines be approved by BLM in the event this route became impassable?

Yes \_\_\_\_\_ No X N/A \_\_\_\_\_

Comments: \_\_\_\_\_

**VII. REGULAR AND CONTINUOUS USE:**

Yes X No \_\_\_\_\_

**VIII. CONCLUSION:**

To meet the definition of a road, items IV or V, and VI-A or B, and VII must be checked yes.

Road: Yes \_\_\_\_\_ No X

Explanation: No maintenance is planned for this route.

Evaluator(s): Heidi Mottl Date: 9/28/07

\* **road:** An access route which has been **improved and maintained by mechanical means** to insure **relatively regular and continuous use**. A way maintained solely by the passage of vehicles does not constitute a road.

a. **“Improved and maintained”** – Actions taken physically by people to keep the road open to vehicle traffic. “Improved” does not necessarily mean formal construction. “Maintained” does not necessarily mean annual maintenance.

b. **“Mechanical means”** – Use of hand or power machinery or tools.

c. **“Relatively regular and continuous use”** – Vehicular use that has occurred and will continue to occur on a relatively regular basis. Examples are: access roads for equipment to maintain a stock water tank or other established water sources; access roads to maintained recreation sites or facilities; or access roads to mining claims.

**John Day Basin RMP Road Analysis Form**

(Factors to consider when determining whether a route is a road for wilderness inventory purposes.)

**Wilderness Inventory Area Name and Number (UNIT\_ID): Clark Canyon (OR-054-014)**

**Route Name and/or Identifier: Horse Mountain North Ridge Spur (Labeled as "B" on Map 1)**

**IX. LOCATION:** Please refer to attached map and BLM corporate data (GIS). Route begins in T 10 S, R 22 E, Section 7, SE ¼ and travels to the north along a ridge for approximately ¼ mile, ending at the termini of the ridge.

**X. CURRENT PURPOSE OF ROUTE:** The route comes off of private land and the purpose is unknown. It may be used by the adjacent private landowner for hunting access or by the grazing permittee to turn-out or gather cattle.

**XI. ROAD RIGHT-OF-WAY:**

Yes \_\_\_\_\_ No  X  Unknown \_\_\_\_\_

**XII. CONSTRUCTION**

Yes \_\_\_\_\_ No  X

Examples:

Yes \_\_\_\_\_ No  X

By Hand Tools \_\_\_\_\_ By Machine \_\_\_\_\_

Culverts \_\_\_\_\_ Stream Crossings \_\_\_\_\_ Bridges \_\_\_\_\_ Drainage \_\_\_\_\_ Barriers \_\_\_\_\_ Other \_\_\_\_\_

**XIV. MAINTENANCE:**

A. Is there Evidence or Documentation of Maintenance using hand tools or machinery?

Yes \_\_\_\_\_ No  X

OR-054-014/ Clark Canyon Inventory Unit

Hand Tools \_\_\_(Y/N)\_\_\_ Machine \_\_\_(Y/N)\_\_\_

Explain: See BLM FAMS data in reference section. Is the route scheduled to receive maintenance? No

B. If route is in good condition, but there is no evidence of maintenance, would mechanical maintenance with hand tools or machines be approved by BLM in the event this route became impassable?

Yes \_\_\_ No X N/A \_\_\_

Comments: \_\_\_\_\_

**XV. REGULAR AND CONTINUOUS USE:**

Yes X No \_\_\_\_\_

**XVI. CONCLUSION:**

To meet the definition of a road, items IV or V, *and* VI-A or B, *and* VII must be checked yes.

Road: Yes \_\_\_\_\_ No X

Explanation: No maintenance is planned for this route.

Evaluator(s): Heidi Mottl Date: 9/28/07

\* **road:** An access route which has been **improved and maintained by mechanical means** to insure **relatively regular and continuous use**. A way maintained solely by the passage of vehicles does not constitute a road.

a. **“Improved and maintained”** – Actions taken physically by people to keep the road open to vehicle traffic. “Improved” does not necessarily mean formal construction. “Maintained” does not necessarily mean annual maintenance.

b. **“Mechanical means”** – Use of hand or power machinery or tools.

c. **“Relatively regular and continuous use”** – Vehicular use that has occurred and will continue to occur on a relatively regular basis. Examples are: access roads for equipment to maintain a stock water tank or other established water sources; access roads to maintained recreation sites or facilities; or access roads to mining claims.

**John Day Basin RMP Road Analysis Form**

(Factors to consider when determining whether a route is a road for wilderness inventory purposes.)

**Wilderness Inventory Area Name and Number (UNIT\_ID): Clark Canyon (OR-054-014)**

**Route Name and/or Identifier: Apparent Camp Trailer Route (Labeled as "C" on Map 1)**

**I. LOCATION:** Please refer to attached map and BLM corporate data (GIS). Route begins in T 10 S, R 22 E, Section 8, SW ¼ and travels to the north along the west edge of Dead Dog Canyon for 1/2 mile. From here the route may have dropped into Dead Dog wash at one time and continued north for an additional ½ mile until exiting BLM at the Section 5/6/7/8 section-corner.

**II. CURRENT PURPOSE OF ROUTE:** The route does not show evidence of recent use. At some point in the past however, the south ½ mile of the route was apparently used to haul in two camp trailers which are parked just off of BLM land on private property in Section 8, SW ¼. There is no ROW in place for use of this route, which was closed to motorized vehicles by the 1996 Sutton Mountain Coordinated Resource Management Plan. BLM discovered the camp trailers during the current wilderness inventory process.

**III. ROAD RIGHT-OF-WAY:**

Yes \_\_\_\_\_ No  X  Unknown \_\_\_\_\_

**IV. CONSTRUCTION**

Yes \_\_\_\_\_ No  X

**3. GIS Program**

USGS National Map project  
BLM GIS data  
BLM Lower John Day River public lands map, June 1991

**The BLM has identified the following man-made features:**

There is an Executive Order (07/2/1910) establishing a 40 acre portion of the unit as a potential power site reserve.

**Team Comments – 8/14/07:**

**Phelps** -Western boundary is a county road that makes it small.

**Mottl**- ONDA thinks we should look at it.

**Tippy**- There's a right of way along the northwest edge. It has trespass horses.

**Zancanella**- Southwest side has a road.

**Welch**- Look at that one on the ground.

**Mottl** – Lyle and Shaun say that juniper treatments are not a priority in this unit.
