N/A	N/A	N/A	N/A	N/A	N/A

2. New Wilderness Characteristic Review

Private Recommendation: Yes _____ No by? _____ Date _____

Results of BLM Analysis: (separate by subunit if appropriate)

Unit#/ Name	Size (acres)	Natural Condition? Y/N/NA	Outstanding Solitude? Y/N/NA	Outstanding Primitive & Unconfined Recreation? Y/N/NA	Supplemental Values? Y/N/NA
OR-054-046 Bone Point	8,609	No	No	No	Unknown

Conclusion
Check One:

_____ Area reviewed lacks sufficient size and does not meet one of the exceptions for small size.

OK-054-046/ Bone Point Inventory Unit

The area-or a portion of the area-has wilderness character.

The area does not have wilderness character.

(1) Describe current conditions: (Include boundary features, land ownership, size, location, topography, vegetation features and summary of major human uses/activities).

The inventory unit is located in Umatilla and Grant Counties, Oregon, approximately 4 miles west of the community of Dale. The unit is bordered on the north and west sides by a BLM-maintained natural surface road (#7569 North Fork John Day Road) and a few small parcels of state and private land. The unit is bordered on the south side by private land and the east side by USFS Umatilla National Forest and state land. The unit is 8,609 acres in size.

Location of Unit: Portions of or all public lands in T. 6 S., R 30 E., Sections 35 and 36; T. 6 S., R. 31 E., Sections 31, 32, 33; T. 7 S., R. 29 E., Sections 1, 2, 3, 7, 8, 9, 10, 11, 12; T. 7 S., R. 30 E., Sections 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12.

Description

This unit includes the BLM lands between the North Fork John Day Road and private lands to the south, which form a narrow strip that is about 15 miles long and ¼ mile to 2.5 miles wide. The majority of the unit consists of lands that were previously privately owned prior to their acquisition by BLM in the Oregon Land Exchange Act of 2000. The unit includes approximately 17.5 miles of the North Fork John Day River and a combination of grassy river benches on both sides of the river and rock walls that line the south river bank. The wider portions of the unit include the steep, forested south side of the river canyon, which is bisected by many steep draws that drop from ridges outside of the unit down to river level. The entire unit has a north facing aspect providing moisture for a coniferous forest of ponderosa pine and white fir, lush riparian species along the riverbanks, and grassy meadows that cover sweeping river floodplains. Other species include mountain alder, red osier dogwood, willow, mountain mahogany, camas root, several species of grasses, sedges and rushes and many spring wildflowers.

The north slopes of the unit provide refugia for many wildlife species due to wetter communities that stay green longer during the hot summer months. Wildlife species include a large deer and elk population, cougar, bobcat, beaver, bald eagle, and a large nesting population of Lewis' woodpeckers.

The North Fork John Day Road is a constructed and BLM-maintained natural surface road (FAMS Road #7569) which forms the north boundary of the unit, but which is located outside of the unit. This public road provides vehicle access to a narrow strip of the unit located between the road and the north side of the river. Vehicle access within the unit includes numerous short spur roads that leave the North Fork John Day Road and access traditional camping spots along the river. Skull Canyon Road is a constructed and BLM-maintained natural surface road (FAMS Road #7569-DO) which leaves the North Fork John Day Road in T 7 S., R 29 E., Section 10, and crosses the river on a newly reconstructed vehicle bridge located at River Mile 43.2. After crossing the river, Skull Canyon Road makes about 2 miles of tight switchbacks up the south side of the river canyon, all within Section 10, before the road is closed at a private land.

OR-054-046/ Bone Point Inventory Unit

boundary. BLM plans to develop a trailhead on the south side of the Skull Canyon Bridge, but does not intend to maintain the switchback road up the south side of the canyon (see Road Analysis Form for Route A). To reach the south side of the river in this unit, the public must cross the Skull Canyon Bridge, ford the river at one of the historical fords during periods of low water, wade across, or float across in a boat.

There are approximately 20 miles of vehicle routes on the south side of the river that were constructed during past logging operations which BLM did not evaluate using the Road Analysis Form (see Map). Most of these routes switchback up the south side of the North Fork John Day River canyon. These routes are officially closed to public motorized travel, but the closures have not been successful. Unauthorized vehicle use originates from recreationists who ford the river at the historical fords as permitted, but don't stop at the signed road closures on the south side of the river. Also, hunters drive onto the closed routes from the private land south of the unit. BLM has no plans to maintain these routes, however, as long as they are passable, BLM intends to use the roads to provide administrative access for resource projects including but not limited to fuels reduction, fire suppression, road decommissioning, fence construction and resource inventories. It is possible that these routes could be re-opened and used during emergency fire suppression activities. These routes do not qualify as of a road because BLM does not intend to maintain them when they become impassable.

Man-made improvements: Several sections of the North Fork John Day River Road include a road ROW (OR02158), but which is located outside of the unit. There is a utility ROW for above ground and buried utility line along the North Fork John Day Road, which is believed to be located within the road ditches and therefore outside of the unit. There is a ROW (OR57564) for a USFS communication site located at Bone Point in T. 6 S., R. 31 E., Section 32. Some of the lands have been leased in the past for potential oil and gas development.

Current land uses: The North Fork John Day River is popular with boaters and anglers who use rafts, kayaks or canoes to float down for a 2 or 3 day trip from Camas Creek near U. S. Highway 395. Car camping, sightseeing and big game hunting are also very popular within this unit. Scenery along this section of the river is outstanding, and this river segment is designated as a State Scenic Waterway and is recommended by the BLM as eligible for Wild and Scenic River designation by Congress. No grazing is authorized within the unit at this time.

(2) Is the unit in a natural condition?

Yes ___ No X NA ___

Describe:

No, the unit is not in a natural condition. The unit has been commercially logged and contains many logging roads.

(3) Does the unit have outstanding opportunities for solitude?

Yes ___ No X NA ___

Description:

Due to the long linear shape of the unit, as narrow as ¼ mile in places, and the private property boundary which borders the unit on one side the entire 15 mile length of the unit, the opportunities for solitude are less than outstanding. The visitor may experience solitude

OR-054-046/ Bone Point Inventory Unit

temporarily, but this experience can be interrupted at any time by the noise and dust of a vehicle driving on the North Fork John Day Road which runs the length of the unit.

(4) Does the unit have outstanding opportunities for primitive and unconfined recreation?

Yes No NA

Description:

Due to the long linear shape of the unit, as narrow as ¼ mile in places, and the private property boundary which borders the unit on one side the entire 15 mile length of the unit, the opportunities for primitive, unconfined recreation are less than outstanding because the narrow boundaries of the unit are confining.

(5) Does the unit have supplemental values?

Yes No NA Unknown

Description:

The extent of supplemental values is unknown.

OR-054-046/ Bone Point Inventory Unit

Prepared by:

Team Members: (Names, Titles, Date)

Initial Review Aug. 14, 2007 by: Heidi Mottl (Recreation/Wilderness), Teal Purrington (NEPA/Planning), Dorothy Thomas (GIS), Anna Smith (Hydrology), Mike Tietmeyer (Range), Dan Tippy (Assistant Field Manager), Rick Demmer (Riparian), Monte Kuk (Wildlife), Robert Vidourek (Forestry), Mike Williams (Planning), Berry Phelps (Recreation), Craig Obermiller (Range), John Morris (Fish), Dana Cork (Transportation), Christina M. Welch (Field Manager), Don Tschida (Fire), Gavin Hoban (GIS), John Zancanella (Cultural), JoAnne Armson (Plants).

Realty/Mineral Records researched by Timothy Finger, BLM Wilderness Specialist on detail from Richland, UT, October, 2008.

Approved by:

Christina M. Welch
Field Manager

Oct. 31, 2007
Date

This form documents information that constitutes an inventory finding on wilderness characteristics. It does not represent a formal land use allocation or a final agency decision subject to administrative remedies under either 43 CFR parts 4 or 1610.5-2.

OR-054-046/ Bone Point Inventory Unit

PURPOSE:

This addendum provides signatory authority across gaps in supervisory oversight in the preparation process.

DISCUSSION:

Further study has been conducted to validate the findings approved by the original signator, Christina Welch. As the new Field Manger for the Resource Area and Ms. Welch's replacement I have been briefed by the specialists assigned on the contents and underlying rationale for the findings contained in this document. I approve these findings with my signature below.

John Day Basin RMP Road Analysis Form

(Factors to consider when determining whether a route is a road for wilderness inventory purposes.)

Wilderness Inventory Area Name and Number (UNIT_ID): OR-054-046/ Bone Point Inventory Unit

Route Name and/or Identifier: Skull Canyon Road - BLM FAMS Road # 7569 DO (Labeled as Route A on Map 1)

I. LOCATION: Please refer to attached map and BLM corporate data (GIS). Route begins in T. 7 S., R. 29 E., Section 3, and immediately crosses the North Fork John Day River at Skull Canyon Bridge as it enters T. 7 S., R. 29 E., Section 10. The route then begins to climb out of the river canyon via approximately 2 miles of steep switchbacks, until it exist the unit onto private property, while still in Section 10.

II. CURRENT PURPOSE OF ROUTE: This route provides administrative and recreation access to the south side of the North Fork John Day River at River Mile 43.2. Through access to Ritter is not possible as the route is blocked by at gate at the BLM/private boundary on the south side of the river.

III. ROAD RIGHT-OF-WAY:

Yes _____ No X Unknown _____

IV. CONSTRUCTION

Yes X No _____

Examples:

Paved _____ Bladed X Graveled _____ Roadside Berms X
Cut/Fill X Other _____

V. IMPROVEMENTS

Yes X No _____

By Hand Tools _____ By Machine X

OR-054-046/ Bone Point Inventory Unit

Culverts _____ Stream Crossings _____ Bridges Yes-1 Drainage _____ Barriers _____
Other _____

VI. MAINTENANCE:

A. Is their Evidence or Documentation of Maintenance using hand tools or machinery?

Yes X No _____

Hand Tools (Y/N) Machine (Y/N) Y

Explain: The route was maintained in the past by the private landowner prior to acquisition of the land by BLM. BLM has recently reconstructed the Skull Canyon Bridge to meet required safety standards. BLM has not maintained the route south of the bridge crossing.

B. If route is in good condition, but there is no evidence of maintenance, would mechanical maintenance with hand tools or machines be approved by BLM in the event this route became impassable?

Yes _____ No _____ N/A X

Comments: BLM intends to maintain this road across the bridge to provide parking for recreation access on the south side of the river. BLM does not intend to maintain the portion of the road that switchbacks up the south side of the river canyon.

VII. REGULAR AND CONTINUOUS USE:

Yes X No _____

The portion of the route containing the bridge received regular use except when BLM temporarily closed the bridge for safety reasons. The portion of the route on the south side of the river received regular use until the landowner blocked through access by placing a gate at the BLM/private land boundary. It is not known what year access was blocked at the gate.

VIII. CONCLUSION:

To meet the definition of a road, items IV or V, *and* VI-A or B, *and* VII must be checked yes.

Road: Yes X No _____

Explanation: Although BLM has determined this route qualifies as a road, BLM only intends to maintain this road across the bridge to provide parking for recreation access on the south side of the river.

Evaluator(s): Heidi Mottl Date: 9/30/07

OK-054-046/ Bone Point Inventory Unit

* **road:** An access route which has been **improved and maintained** by **mechanical means** to insure **relatively regular and continuous use**. A way maintained solely by the passage of vehicles does not constitute a road.

a. **“Improved and maintained”** – Actions taken physically by people to keep the road open to vehicle traffic. “Improved” does not necessarily mean formal construction. “Maintained” does not necessarily mean annual maintenance.

b. **“Mechanical means”** – Use of hand or power machinery or tools.

c. **“Relatively regular and continuous use”** – Vehicular use that has occurred and will continue to occur on a relatively regular basis. Examples are: access roads for equipment to maintain a stock water tank or other established water sources; access roads to maintained recreation sites or facilities; or access roads to mining claims.

3. GIS Program

USGS National Map project

BLM GIS data

BLM Upper John Day River public lands map, June 1991

The BLM has identified the following man-made features:

There is a communication site located in T. 6 S., R. 31 E., Section 32 (OR57564)

There is a 17.5 foot wide ROW (OR 02158) located in T 7 S., R 29 E., Sections 1, 2, and 3, and in T 7 S., R 30 E., Sections 1, 2, 3, 4, 5, and 6, and a ROW located in T. 6 S., R. 30 E., Sections 35 and 36 (OR 36188), both of which form a portion of the boundary but which are not within the unit. This ROW separates the Bone Point unit from the Stoney Creek unit.

Team Comments -8/14/07:

Vidourek – Old logging roads were constructed. Several known, but closed fords.

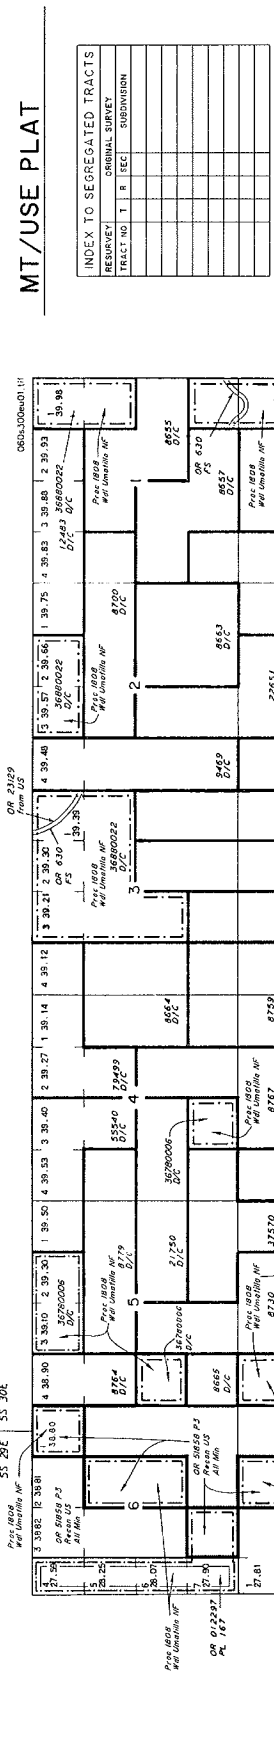

Tippy- Area has steep topography.

Morris- I don't know what opportunity for solitude there is. Adjacent private lands have recently changed hands. The private landowner and their guests like to go hunting on the adjacent public lands. There is a lot of hunting up Sulfur Canyon.

Phelps-The limited size and shape limits solitude and recreational opportunities. There have been past logging activities.
