

Beautiful, but Take Care!

Western Rattlesnake

The Western Rattlesnake is one of the many different types of snakes that live on the Table Rocks. If you're lucky, you might see one of these beautiful snakes.

Did You Know?

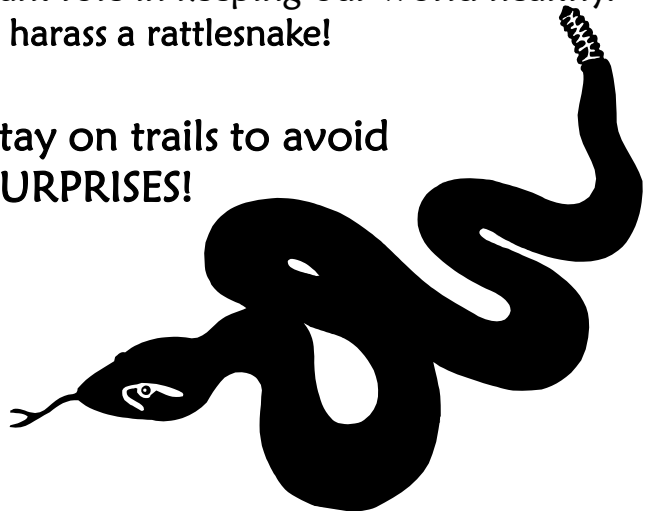

The Western Rattlesnake is the only poisonous snake in western Oregon.

If you encounter a rattlesnake, remain calm, keep a safe distance, have a good look if you can (they are quite beautiful), and ease your way around it. They will usually try to get out of your way, so be careful not to corner them. Rattlesnakes are rarely aggressive. They play an important role in keeping our world healthy. **Never harm or harass a rattlesnake!**

Stay on trails to avoid
SURPRISES!

*All of the animals live together in harmony on the Table Rocks.
you are a visitor in their home. Please be a considerate guest!*

Remember,
