How to get there

Difficulty Rating

Easiest Gravel or dirt surfaces which are relatively flat and wide. Generally wide enough for an ATV to pass a full-sized vehicle. May be dusty but are relatively smooth throughout with no rocks or roots protruding more than three inches above the surface.

More Difficult Loose gravel, sandy, rocky, or slickrock surface. May have short sections which are narrow. Can have blind turns, steep or roller coaster grades, minor drop-offs, dust, ruts, and frequent changes in riding surfaces. Occasional obstacles may strike the frame.

Most Difficult Rocky surfaces, sharp turns, switchbacks, steep grades, narrow passages, low overhangs, ledges, and large rocks. Can be slippery and muddy when wet. May have tree stumps, limbs, or other debris. Machines with low ground clearance may strike or high center on obstacles. Some riders may be more comfortable using four-wheel drive machines.
