New data elements:

RESOURCE CONFLICT NAME – The name of the type of resource conflict identified. The domain values (pick list; e.g., ACEC, DWMA, NLCS Lands, Sensitive Species, Threatened or Endangered Species, Wilderness Study Area, etc.) will be maintained by the WO Branch of Lands and Realty. This data element will be associated with action code 046 – Resource Conflict.

The domain values that appear in the pick list are shown below. The presence of a colon at the end of a value indicates the need to provide more specific information using the Resource Conflict Text/Remarks field.
