

**COMPLIANCE CERTIFICATION
DAM SAFETY RIGHT-OF-WAY AUTHORIZATIONS**

Memorandum

To: Director
From: [STATE DIRECTOR]
Subject: Certification of Dam Right-of-Way Authorizations

I certify that BLM-[STATE] has amended all of the significant and high hazard dams with existing authorizations.

The Office of Inspector General for the Department of the Interior (OIG), released Report No. WR-EV-MOA-0015-2011, "Bureau of Land Management, National Park Service, and Office of Surface Mining Reclamation and Enforcement's Safety of Dams: Emergency Preparedness" (OIG Report). In response to OIG Report Recommendation 8, field offices have amended each significant and high hazard dam authorization to include the required safety term and condition in their respective jurisdictions. The field offices amended the authorizations within 120 days of the Instruction Memorandum (IM) to protect public health and safety associated with authorized dam facilities. Field offices will continue to ensure all new authorizations contain the new term and condition.

Attached is a copy of the Legacy Rehost 2000 System report for [STATE] showing dam right-of-way authorizations and relevant amendment information. If you have any questions, please contact [insert name and contact info for STATE].
