## Color Your Own Alaska Bird Guide

Create your own field guide of Alaska birds. Print and color the pages. Assemble the finished pages and take your guide outside to study the birds around you.

### Directions

1. Print the pages you wish to color. If you don't have a printer, trace the birds off your computer screen.
2. Research each bird. What does it look like? Where does it live? What other interesting information did you learn about the bird?
3. Color each bird based on what you learn.
4. Add field notes about each bird's size, habitat, food, behavior, and other information.
5. Design your field guide cover. Staple your finished pages into a book.
6. Use your field guide to identify the birds you see. Record the dates and places of your sightings on each bird's page. What do you observe?
7. Keep learning! Add pages with your own drawings as you discover new birds.

### Materials

- Printout of bird pages, or paper to trace the birds
- Colored pencils, crayons, or markers
- Stapler
- Birding website or field guide

### Questions

- Which bird did you find the most interesting? Why?
- Which of the birds live near you?
- Which birds are around at different times of the year?
