## Time Outside Together (TOTs): Tracks

Resources to explore the natural world with children under five.

### Winter Tracking

Winter is the perfect time to look for tracks! Footprints in the snow help us observe evidence of animals that share our spaces. Use the chart below to identify common tracks. When you find one, create a story together about what the animal (or kid!) might have been doing when it made the track!

 <p>Moose</p>	 <p>Dog</p>
 <p>Kid</p>	 <p>Snowshoe Hare</p>
