		The current public input period, for providing input to inform the application	
		evaluation determination, is open through January 7, 2022. If there is a favorable	
		application evaluation determination made for the project, the BLM would	
		continue processing the application by initiating an environmental review/National	
		Environmental Policy Act process. That process would include public comment	
		opportunities for Scoping and for the Draft Environmental Impact Statement. The	
	MI - 1 - 1 1 - 1 - 1 - 2 - 2 - 2 - 2 - 2 - 2 - 2 -	environmetnal review would also involve consultation and coordination with local,	
33	What addl opportunities are available to oppose this application?	federal, and state agencies and tribal governments. CALENDAR YEARS 2021 - 2025 RIGHT-OF-WAY RENTAL SCHEDULE RE-ASSIGNMENT

		Nye County is in Zone 4 and the 2022 Per Acre Rate for Solar Energy Development	
	It sounds as if the BLM acreage use rate is negotiable?	is \$103.98 per acre	
	I won't be speaking today	Thanks for letting us know.	
36	Actually I will speak	Thanks for letting us know.	
		Copper Rays Solar, LLC has stated in their preliminary Plan of Development that the	
		most probable source of construction and operations-phase water for the proposed	
		project would be water leased or purchased from either a public or private entity	
		utilizing existing water rights, either within the Pahrump Valley Basin or trucked	
		from the Las Vegas area. The project does not anticipate drilling any new water wells.	
		The Nevada Division of Water Resources is responsible for the allocation of water	
		resources within the State of Nevada. If the project receives a favorable application	
		evaluation determination, the BLM will consider impacts from water use during the	
		environmental review/National Environmental Policy Act process. BLM considers	
	How will this project inpact the water table? How much water are you	water, both surface and groundwater, within the broader context of all resources	
27	How will this project inpact the water table? How much water are you requesting to use in this project?	on BLM administered lands and their interaction as they relate to BLM responsibilities.	
5/	I've been registered to speak in err (speaker #4, Roben Armstrong) for this round. I	r copensionated.	
38	do not wish to speak at this time. Thank you.	Thanks for letting us know.	
		The project sponsor, Copper Rays Solar, LLC, has indicated that a purchaser for the

48	Is there a reason to place this project near a town	The applicant, Copper Rays Solar, LLC, identified and applied for the proposed project site. The BLM is currently considering the appropriateness of the application utilizing the application evaluation process identified in the right-of-way regulations. The current public input meetings and public input period are a critical piece of the application evaluation process and will inform BLM's decision on whether to continue processing the application (initiate the environmental review/National Environmental Policy Act process).
49	Why are the Pahrump band of Paiutes not being consulted?	The BLM is consulting with Federally Recognized Tribes. Additionally, the BLM is interested and values input from Federal, state, and local agencies and the public, to help inform the application evaluation for the Copper Rays Solar Project.
	Are all letters and comments available to the public? Are transcripts from all the hearings available? Are all documents related to the project between developers	BLM is committed to an accessible public meeting experience. To ensure this, SNDO follows a standard process and agenda for virtual meetings. Meetings are recorded and posted with closed captions. Input during public comment is transcribed and included as part of the public comment period. Questions are taken using the Zoom Q&A feature and are answered by a mix of typing some answers which all participants can see as well verbally answering some questions which participants can hear. Questions are answered in both formats to ensure as many questions as possible are answered during the meeting time. Zoom Q&A and chat features are 508 and WCAG compliant and video of meeting is closed captioned. Phone in options are available and instructions are included specifically for those using that functionality to provide comment. A phone number is provided on the news release and website to ask questions outside meeting times. Questions and comments may also be emailed and mailed
50	and BLM made available?	until the January 7, 2021 deadline Thank you for your comment.
