

Superior National Forest Application

Dec. 4, 2021

Hello,  
My family has enjoyed canoeing in the BWCA for many years. It is a national treasure. We have met people from all over the world on our trips there. Please protect this natural area by not allowing mining. It is much too dangerous and I am fearful greed will compromise safety for the environment. The mining industry has an abysmal environmental track record. Lots of promises for safety but few responses to disaster. No amount of money will bring back this pristine area polluted.
