Cliffside Gas Plant Status Report

Date & Time of Outage: September 19, 2022 at 2245

Perceived Cause of Event:
- Plant tripped on K100 vibration at 10:45 PM. Appears to be Instrumentation related to vibration VSHH1185D for throw #4.

Current Status:
- The K100 vibration issue is addressed. The DGA Heater is operable
- Worked with Xcel Energy to assure power availability for restart.
- Plant was restarted overnight. It’s cooling down and we’re working towards achieving product purity levels.

Forecast:
- Anticipate reaching purity levels within 24-48 hours.

Pipeline Pressure at Cliffside: At 0600 (CT), Friday, September 23 = 574 psig
