- Budget Analysts

Alaska Interagency Coordination Center

Dispatches initial attack resources, manages incident logistics, and collects and analyzes fire information. Opportunities include Logistics Dispatcher, Fire Logistics Dispatcher and Fire Dispatch.

Logistics Branch

Provides facilities maintenance, fire supply, transportation support, dining hall and barracks operations. Positions include Laborers, Custodial Workers, Warehouse Workers, Supply Technicians, Packers, Maintenance Mechanics, Automotive Mechanics, Carpenters, Motor Vehicle Operators, Cooks and Food Service Workers.

Business and Technology Branch

Provides interagency telecommunications, remote weather sensing and lightning detection, and information resource management systems for the fire program. Positions include Radio Communication Specialists, Geographic Information Specialists, Information Technology Specialists, Purchasing Agents and Administrative Specialists.

Aviation Branch

Provides aviation and safety management to the fire program including dispatching and monitoring of aircraft loads, aircraft parking and fire retardant support. Positions include Fuel Distribution System Workers, Aircraft Attendants, Dispatchers, Airtanker Base Managers and Aviation Management Specialists.

Benefits

Most positions are hired under the Federal Civil Service Pay System. Pay ranges vary depending upon the position and experience. Employees are paid overtime for hours worked beyond the regular shift. Firefighters receive hazard pay in certain circumstances. Career seasonal and permanent employees accrue sick and annual leave. They are also eligible for health and life insurance and retirement benefits. Temporary employees accrue annual and sick leave and are eligible for health benefits.

How to Apply

Most temporary and career seasonal positions are advertised on USAJobs.gov between October and January each year. Permanent full-time positions are advertised as vacancies occur. Go to <https://bit.ly/3loSfSo> for more information on how to navigate and apply at USAJobs.gov.

There are many diverse career opportunities with BLM Alaska Fire Service. If you like working outside and in a rewarding career with the opportunity to protect and manage some of the most beautiful landscapes in the country, working with the BLM AFS may be for you.

Many BLM AFS employees began their career working as a temporary employee and progressed to become permanent employees with the organization. Temporary employees normally work from May through September. Career seasonals work a minimum of six months – April through September. Permanent full-time positions are year round. Employees may be stationed in remote field camps for up to two weeks. Payroll deduction is offered to pay for housing at the BLM barracks for temporary and career seasonal employees and meals are available at the BLM dining hall, both located on the U.S. Army Garrison at Fort Wainwright.

Fireline positions require meeting established medical and physical fitness standards tests and any additional fitness requirements specific to the position.

Smokejumper

Smokejumpers are specialized, experienced firefighters who parachute into remote areas to perform initial attack on wildland fires. Smokejumpers go through rigorous and intense training and must be in top physical shape. Alaska Smokejumpers suppress and control fires using power saws and pumps with hose, hand tools and burning devices such as drip torches. You must have prior wildland fire suppression experience to apply.

For more information visit:
<https://www.blm.gov/programs/fire-and-aviation/state-information/alaska-fire-service/fire-operations/smokejumpers>

Fire Specialist

Fire Specialists are highly trained personnel experienced in fire suppression, aviation operations and hazardous fuel reduction. Fire Specialists primarily respond to extended attack fires, and when not on fire assignment, perform project work such as prescribed fire, aviation mission planning, fireline equipment development, and training coordination and support.

Hotshot

AFS sponsors two 20-person Type 1 Interagency Hotshot Crews. Work is of a hard, physical nature. Previous experience is not mandatory but is highly desirable. Applicants should be in excellent physical condition and must meet established fitness standards as a condition of continued employment. Hotshots can expect to live under primitive field conditions for weeks at a time and away from the home base for up to three months at a time.

Casual Hire/Administratively Determined

More commonly known as Emergency Firefighters (EFF), BLM AFS hires personnel through local job centers or Tribal/city offices on an as-needed basis to supplement the regular work force during periods of heavy fire activity. Casual hires are single-resource individuals who fill positions such as warehouse workers, drivers, timekeepers, food service workers, dispatchers and some firefighter positions. Job centers and Tribal/city offices normally take applications during the month of April. All casual hires are required to complete online Federal Emergency Management Agency training courses *ICS-100 Introduction to the Incident Command System* and *ICS-700 An Introduction to the National Incident Management System*.

North Star Crew

The North Star Fire Crew is an entry level crew and provides employment opportunities for individuals with limited or no fire experience. While on fires, crew members are paid Emergency Firefighter wages. When not on fires, project work will be performed on a volunteer/non-paid basis with housing and meals provided. This crew, classified as a Type 2 crew, provides an experienced pool of potential recruits for Type 1 Hotshot Crews.
