Santa Fe, NM 87502-0115

I have owned a manufacturing facility in Carrollton, Texas for more than thirty seven years. My business is located approximately five miles south of the Lewisville Lake dam. This dam is considered by the U.S. Army Corps of Engineers to be the seventh most dangerous dam in the United States requiring more than \$500 million dollars in repairs. They are currently spending \$50 million dollars for urgent repairs.

Any further damage could be catastrophic for hundreds of thousands of people from Lewisville to Dallas. Oil and gas drilling and fracking in or near the lake that could cause tremors or earthquakes could cause billions of dollars in property loss and thousands of lives.

Please consider the lasting effects that selling this property to oil companies could have on north Texas and the entire country.

Sincerely,

Patrick McEvoy, Jr.  
Owner
