To whom it may concern

Re: Fracking for Natural Gas at
Hickory Creek + land at Lake Lewisville +
Surrounding area.

Many people fish at Lake Lewisville, my
family eat catfish from this lake on a
regular basis.

The lake is a reservoir for water for many
communities including Schools, Lake Dallas,
Denton, Argyle, Little Elm and others
School districts. Our drinking water comes
from this lake.

Livestock on land adjacent to this lake
also drink this water. That livestock
enters the food chain. Approximately 40
horses + riders ride in Copper Canyon on the
Lake Shore every week + drink the water.
Golfers in Hickory Creek + Copper Canyon

2.

also eats and drinks at the Lake Shoreline.
There are four RV parks at that
area of the Lake Alone.

In Spring, Summer + Fall family are
Swimming in Lake Lewisville.

Do you want the lives of so many
people + animals to be affected by
this.

Use common sense you are opening
yourself up to a Law Suit.

This is on our doorstep not New
Mexico.

The people that work at the Core
of Engineers do not personally own the
Land or the Government entities.

I hope you consider my issues and
those of this community that were
never told of this issue.

Thank you!
