Dear BLM New Mexico, Oklahoma, Texas and Kansas,

I have recently read of plans to lease out portions of land near and under Lewisville Lake to be used for drilling. As a 20 year resident of this area I formally request BLM not to proceed with the proposed auction of this land for drilling purposes.

In addition to the many environmental damages drilling does, the residents of North Texas and all communities living downstream of Lewisville Lake cannot risk the contamination to our drinking water. For this and the many other reasons I do not agree with the leasing of this land for drilling or fracking operations.

Sincerely,

A handwritten signature in black ink, appearing to read "Gaby Pulido", with a stylized flourish at the end.
