To Whom It May Concern:

This letter is to express my protest of hydraulic fracturing on Lake Lewisville. I do not support auctioning off drilling rights for this land. Not only does research suggest that this will have a negative impact on the surrounding environment, but Lake Lewisville is not a stable lake to substantiate fracking. For countless years the dam on Lake Lewisville has been deteriorating and continues to cause concern for the entire lake and nearby residents. Auctioning off this land for hydraulic fracturing would not only result in an unsound environment for residents receiving water from the lake, but due to the already fractured dam, it would also result in an unstable setting for fracking.

Thank you in advance for your consideration.

Regards,

Caroline Peterson
