Dear Sirs,

As residents of Denton County living near Lake Lewisville, we are writing to oppose the proposed auction of acreage of land near Lake Lewisville. The land could be used for gas well drilling.

We residents were not aware of this proposal until very recently. That is not right.

We have concerns about water quality, environmental impact, and the total effect on our area. A continuous steady supply of clean drinking water is of major importance to all of us. Nothing should be allowed to threaten that.

The possibility of gas well drilling and fracking in our Lake is horrifying! Contamination of our drinking water source is dangerous to us all. A university study found earthquakes and tremors connected to these activities.

The proposed auction of any areas in and around Lake Lewisville is opposed by us, and we do not want this to continue.

Thank you,

Mr & Mrs George Pattison

Highland Village, TX 75077
