BLM Representatives;

I am absolutely opposed to any form of oil or gas drilling in the area of Hickory Creek, Texas on federal land, west of 35E in the Barnett Shale. I am a resident of Shady Shores, TX. we have a deep water well for all our uses including drinking, and am extremely concerned of effects of drilling. Also concerns for Lake Lewisville and all who benefit from it. Safety is ultimately our main concern. In the same newspaper is an article re: concerns for the dam on Lake Lewisville. Knowing there has been erosion issues in the past and there are still serious concerns should be enough alone to halt any further plans for this project. The risk far outweighs the benefit, we are definitely protesting any further plans for oil/gas drilling in above mentioned area now or ever.

Sincerely,  
Marilyn and Don Meyer
