19 February 2016

I must protest the proposed the auction of gas drilling rights on Lake Lewisville. The Colony gets its drinking water from the lake and as such we are at great risk if any drilling is allowed to endanger our source of water.

It is known that the Army Corp of Engineers considers the damn unstable and are working on a proposed fix. Any drilling or fracking will put additional strain on the damn. While it is debatable whether fracking is the cause of numerous earthquakes in North Texas, the prudent course would be to prohibit any drilling in or around Lake Lewisville.

Please with stop the auction and so we can maintain the quality of life we now have.

Respectfully submitted,

Bill Swink
