BLM
New Mexico State Office
301 Dinosaur Trail
Santa Fe, NM 87508

Dear BLM:

We are opposed to the selling of natural gas leases in Lake Lewisville. There are two major issues: water contamination, seismic activity and the Lake Lewisville dam.

The dam is the 8th riskiest in the nation, according to the Corps of Engineers. Any activity that could possibly weaken it should be avoided.

Lake Lewisville provides drinking water for over a million people in North Texas, contamination would be a disaster.

We urge the BLM to reconsider selling the drilling rights and to protect the interests of communities, not business.

Sincerely,

Rowland Harvey
Mary Morris
