Dear BLM:

I stand in full opposition to the proposed leasing of ANY federal oil and gas lands within, or under a public water supply.

Your proposed land leases under Lewisville Lake, Denton County, Texas is heinous and wrong. To blatantly poison a public water supply by letting it to companies known for using water born carcinogens, is blatantly criminal in scope.

You folks don't live here. You need not drink poisoned water over the next 10 years. Your children won't get sick or develop untreatable maladies because they drink poisoned water. This isn't Flint Michigan, this is our home and we do not want our water supply ruined by Big Oil & Gas. Our aquatic estuaries must remain as untainted as possible.

I request that this proposed mineral lease project be TERMINATED!

J. Aaron Cundall
