Dear BLM,

I read in the newspaper that your company plans on leasing out land to oil companies for drilling near Lake Lewisville, Texas. I am a resident of the one of the cities immediately surrounding the lake. I was told that it is your responsibility to protect the public lands and our natural resources. Lake Lewisville is a big source of drinking water for Denton and Dallas Counties. I can already see the pollutant headlines in the papers now. I have small children and would really like for them to not get cancer or other possible ailment from the drinking water. I would hate to have the Flint, Michigan water scandal in Texas, in my neighborhood, affecting my children.

I do not think the earthquakes caused by fracking and/or oil drilling is good for the dense population. Please reconsider this oil lease proposal. Please be responsible in keeping families and children safe.

Respectfully submitted,

Francisco and Rebecca Aranda
