Dear BLM,

02/15/2016

We understand you are considering leasing land to oil companies for drilling/fracking near Lewisville Lake in the Hickory Creek area of Denton County, Texas. We believe this is a big mistake and we are asking you to please reconsider. This plan seems to violate your responsibility as the protector of public lands and our natural resources.

Drilling or fracking this land next to a major source of drinking water (ours) is only asking for problems. We have witnessed the failure of oil companies to be able to clean the water supply after an spill. We understand that oil companies want to guarantee that spills will not happen; however, it seems to occur very often.

The area in question is densely populated and should remain a recreation area or wildlife reserve. The residents of Denton County do not want earthquakes caused by fracking/drilling. We would appreciate it if you would reconsider this proposal. We don't want to become another Flint, Michigan in North Texas.

Regards,

Melinda Jobe Polvado
