Re: Protest of Lake Lewisville project, NM-201604-043

Dear BLM,

As a homeowner living on the flood plain 3 miles south of Lake Lewisville, I protest the idea of allowing fracking under Lake Lewisville.

The Lake Lewisville dam has been rated as the 8<sup>th</sup> most at risk dam in the United States. It is currently under repair for a 160' slide which happened during the exceptional rains in the Spring of 2015.

Why risk the integrity of the dam by allowing fracking and the possible side effects including a catastrophic failure?

You may endanger lives by allowing fracking, why risk it?

Sincerely,

Michael Klineen
